Drafts of FAQs that are intended to remove the confusion around environment more generally. Please provide feedback on these q are they clear, would a link to additional resources help or just c

1. What's wrong with using tables for layout?

Although it is possible to use tables for layout of elements (cour recommended. You should try to format courses using css. If a lo is formatted in a way that makes it easily understandable by some with layout tables and how to create accessible tables.

2. How do html heading levels help students navigate courses?

People who use screen readers (e.g. blind, visually impaired, lear determine where they are on a course site. The screen reader an content.
