Unit 7 Learning Diary:API

Chenxin Zhang
3568978

At The beginning, I was planning to use the Financial API (Yahoo finance, google finance and etc) to display real time market data in my website. However, it turns out these Financial service's provider are getting greedy, many of the free API are no longer available and now they often need a monthly subscription

So I decided to just use free API. Which I Decided to use iframe. Put YouTube videos under the according tabs so the the user can have watch the videos and have a idea about what they are talking about in the videos.

https://developers.google.com/youtube/iframe_api_reference

Learning Outcomes	Evidence of Meeting the Learning Outcome	Your Own Assessment of the Grade You Believe Would Be Appropriate
- When you have completed this unit, you should be able to use JavaScript to access and use web services for dynamic content	The goal in the proposal is not implemented. However the video API works out pretty well	B
