GENERAL INFORMATION

ABOUT THIS CATALOGUE

Use the table of contents to look up the general category, detailed tables appear at the start of each chapter or you can use the index located on **page 318** by name to find a specific item. We have worked very hard to ensure the information contained in this catalogue is up to date and accurate at the time of printing. However, the goods sold may not be exactly as depicted as roll sizes and specifications may vary. Some items may not be exactly as illustrated as some pictures are shown to provide a representation of the product only. Jackson's cannot guarantee supply of any item listed in this catalogue. We cannot control the final use of the product, therefore it is the responsibility of the user to determine the suitability of a product for its intended use.

COLOURS

Due to the printing process colours should not be considered exact matches. To get an exact shade refer to the sample card or the actual product.

PRICING

See Price List for current pricing.

ORDERS

Please Email or Fax your orders, using the product codes listed in this catalogue, to the Jackson distribution centre nearest you. This will enable us to fill your order faster and with greater accuracy. Orders can also be placed by calling your local distribution centre. See the inside cover for the location nearest you.

RETURNS

We cannot accept returns without a return authorization. Goods returned without authorization may be refused. Returned goods may be subject to a restocking charge. No returns on cuts under 5 yards. No returns accepted after 30 days.

MORE INFORMATION

To receive product information, or request samples, please contact your local Jackson office where one of our friendly Customer Service Representatives will be pleased to assist you.

TRADE ONLY SHOWROOMS

Each of our distribution centres has a Trade Only showroom. You are welcome to bring your customers. Please drop in and check us out.

SHIPPING

All orders are F.O.B. nearest Jackson distribution centre. Goods shall be shipped via Jackson's choice of carrier unless specifically requested otherwise at time of order.

JACKSON

VINYL – CARE & CLEANING SUGGESTIONS

WARNING

Many strong cleaning agents such as dish-washing detergents, bleaches or any petroleum based cleansers or solvents can permanently damage vinyl and should never be used. Powdered abrasives, cleaners containing abrasives, steel wool and industrial strength cleaners are not recommended for vinyl. Any lacquer solvent will cause immediate irreparable damage to vinyl. Wax should never be used on any vinyl upholstery as it will cause premature embrittlement and cracking. Dilute chlorine bleach before using. Never use at full strength.

Ordinary Soil Removal — Vinyl upholstery should be cleaned periodically to prevent build-up of dirt and contaminants which may permanently stain the vinyl if they are not removed. Most ordinary soil can be removed by washing with warm soapy water and rubbing briskly with a soft cloth, followed by several clear water rinses. A soft bristle brush may help loosen soil embedded in embossed surfaces. For more stubborn stains use a mild detergent. Check the product label to ensure it is recommended for vinyls.

Oil Base Paint — The use of turpentine in a well ventilated area will remove fresh paint. Dried paint must be moistened carefully with a semi-solid gel type stripper so that the softened paint can be gently scraped away. Rinse with soap and water. CAUTION: Direct contact with paint strippers will remove the print pattern on the vinyl.

Latex Paint — Fresh paint can be wiped off with a damp cloth. Hot soapy water will normally remove dried latex.

Tar, Asphalt — Remove immediately, prolonged contact will result in a permanent stain. Use a cloth lightly dampened with mineral spirits or kerosene and rub the stain gently, working from the outer edge of the stain towards the center in order to prevent spreading. Rinse with soap and water.

Chewing Gum — Scrape off as much as possible with a dull knife. Rubbing with an ice cube will assist and make it easier to remove when scraping. The remaining gum should be removed in a well ventilated area using a cloth saturated with mineral spirits. Use light rubbing. Rinse thoroughly with clean water.

Surface Mildew — Wash with diluted bleach, use a soft brush for stubborn growth. Rinse repeatedly with clean, cold water.

Ballpoint Ink — Ink spots will stain vinyl permanently. Immediately wipe with rubbing alcohol and a clean cloth.

Lipstick, Grease, Oil, Shoe Polish, Crayon — Wipe off excess. Apply a small quantity of mineral spirits with a soft cloth and gently rubbing. Work inward to prevent stain from spreading beyond its original source. Immediate removal of shoe polish is suggested or permanent staining may occur. Rinse thoroughly with clean water.

Candy, Ice Cream, Fruit, Liquor, Wine, Soft Drinks — Use clear lukewarm water and a sponge repeatedly. Loose material should be gently scraped with a dull knife. Any soiled area remaining after drying should be gently rubbed with a cloth spotted with a small quantity of alcohol. Rinse thoroughly with clean water.

Blood — Rub out any spots with a clean cloth soaked in cool water. If stubborn spots remain, use household ammonia and rinse repeatedly with a clean, wet cloth. Do not use hot water or soap suds as this will set the stain.

Vomit — Sponge the stained area with soapy water containing a diluted bleach until the stain is removed. Rinse thoroughly with clean water.

Urine — Sponge with soapy water containing a small amount of household ammonia. Rinse thoroughly with clean water.

MARINE FLOORING

COMMANDER

- 100% UV Stabilized BCF Olefin
- Width: 72" wide
- 18 oz. per sq. yd.
- Put up on rolls of approximately 33 yards (30 meters)
- Applications: Marine and automotive carpet

Commander is the ideal choice for marine and automotive carpeting. It is UV stabilized with low water retention. It offers superior surface coverage with no fuzzing or pilling. Commander meets the flammability requirements of the motor vehicle standard MVSS302.

MARINA

- 100% Solution Dyed Polypropylene
- Width: 72" wide
- 16 oz. per sq. yd.
- Put up on rolls of approximately 60 yards (54 meters)
- Applications: Marine carpet, trim for cars, trucks, trailers

Marina offers excellent dimensional stability with its needle punch Dilour construction. It is easy to cut, fit and contour and does not “grin” when folded. Marina is ideal for marine and automotive use because it is resistant to fade, mildew, gas, salt and oil.

MARINA MOCHA

MARINA BLACK

MARINE FLOORING

NAUTOLEX®

- 100% PVC on Polyester
- Width: 74" wide
- 24.3 oz. per sq. yd.
- 25 yard rolls

Nautolex® Marine Vinyl Flooring has the appearance of outdoor carpeting, but has the strength and skid resistance needed for marine environments. It can be used on interior and exterior boat floors and it's UV protected and anti-microbial coating will have your floor holding up to many years of use.

HULLINER

- 100% Solution Dyed Polypropylene
- Width: 72" wide
- Put up on rolls of approximately 50 yards
- Applications: Marine hulliner and headliner

Hulliner is stain, mold, mildew and UV resistant. The geometric construction makes for easy pattern matching. It is easy to cut, fit and mold to the desired shape or size and it will not fray or unravel.

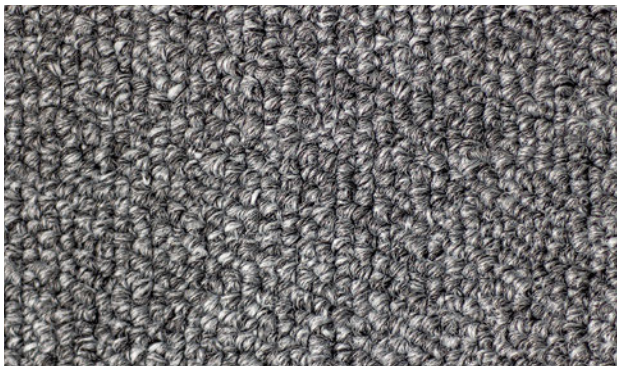
FATHOM

- 100% Solution Dyed Polypropylene
- **Fathom 1** is 72" (6 feet) wide
- **Fathom 2** is 144" (12 feet) wide
- 29 oz. per sq. yd.
- Put up on rolls of approximately 30 yards
- Applications: Snap Down Marine carpet

Fathom's berber construction and heavy rubber backing make it the perfect choice for Snap down applications on any marine project. Fathom is resistant to fade, mildew, gas, salt and oil.



FATHOM GREY

FATHOM BEIGE

SHOAL

- 100% UV Stabilized BCF Olefin with marine latex backing
- Width: 102" (8.5 feet) wide
- 14 oz. per sq. yd.
- Put up on rolls of approximately 33 yards
- Applications: Marine and automotive carpet

Shoal is the ideal choice for marine and automotive carpeting where a wide width is needed. It is UV stabilized with low water retention. It offers superior surface coverage with no fuzzing or pilling. Shoal meets the flammability requirements of the motor vehicle standard MVSS302.

SOFTSIDE® MARINE | COMPASSHB™

HyBrid Marine Flooring

Hybrid Woven Construction
Combines the strength and durability of vinyl-coated polyester yarns woven with the design, depth and comfort of olefin yarns.

Exclusive Microban® Antimicrobial Protection
The only marine flooring fabric with the leading brand of mold, mildew and bacteria growth protection built in.

Environmentally Friendly
Foam layer made with bio-based polymers.

Slip Resistant
More surface texture with woven olefin yarns.

Low Maintenance
Sweep or spray and walk away.

MARINE FLOORING

COMPASS FLOORING

- Front: Woven PVC and Polypropylene
- Back: Urethane Foam with Polyester Felt
- Width: 102” wide
- 57.5 oz. per sq. yd.
- 30 yard rolls

COMPASS HB™ Marine Flooring uses woven PVC and Polypropylene yarns to achieve extreme durability for long-term performance and value. The low-profile pattern will not matt or crush down over time like traditional carpeting.

Manufactured with solution dyed, UV stabilized yarns for protection against fading, degradation, mold and mildew, COMPASS HB™ flooring is designed for both direct glue down for full deck applications and custom fit mat installations. Yarns are naturally stain resistant for easy maintenance and the face and the backing do not absorb water.

M2 COLLECTION

This collection is comprised of 20 premium marine vinyls suitable for use in marine, automotive, contract and upholstered furniture applications:

Allsport, Biscayne, Cantech, Carina, Catalina, Edge, Freeport, Hexx, Kixx, Monterey, Natural Linen, Newport, Prodigy, Protégé, Rush, Shock, Seabrook, Wave, Willow, Yorktown

The above patterns all meet the following Fire Resistance specifications:

- California Technical Bulletin 117 Section E
- UFAC Class 1
- BIFMA Class 1
- MVSS 302 (except **Cantech, Willow, Protege, & Seabrook**)

Product Characteristics shared by all 20 patterns:

- Width: 54" wide
- Put up on approximately 40 yard rolls (36.5 meters) / **Hexx, Kixx & Natural Linen:** 30 yard rolls
- Cold Crack: -32 °C except **Allsport** which is -50 °C
- UV stabilized pigments
- 1000 hour minimum Weather-Ometer®
- Heat sealable
- Mildew Resistant

NOTE: Photos enlarged to show pattern detail. See sample cards for accurate scale.

SURF

- Pink-stain resistant Vinyl
- Mildew & Ultraviolet resistant
- 4-way stretch
- Applications: Contract and Hospitality settings, Marine

The wavy lines in Surf's deeply grained surface mimic the flow of the sea. The matte finish keeps it feeling casual, as do the 23 colourways in a palette of neutrals plus earthy reds, greens, oranges and blues.

Flame certification/listing available:

- CA TB 117-2013 (Section 1 - Cover Fabric)

SOFTSIDE® COLLECTION

The Softside® Collection consists of 22 patterns designed with 100% Polyester Hi-Loft 2™ backing for added durability:

Anchor, Apex, Aries, Beluga, Breeze, Carbon Fiber, Diamante MQ, Gemini, Heidi Marine, Islander, León, Marlin, Navigator, Orion, Pegasus, Polaris, Rattan, Reflex Metallic HQ, Seabreeze, Simtex, Trexx Metallic, Zander

The above patterns all meet the following Fire Resistance specifications:

- California T.B. 117-2013
- FMVSS 302 (except **Trexx Metallic**)
- IMO FTP 2010 Code MSC.307(88) (except **Trexx Metallic** and **León**)
- NFPA 260 - Cover Fabric - Class 1
- UFAC Fabric - Class 1

Product Characteristics shared by all 21 patterns:

- Face: 100% PVC
- Back: 100% Polyester
- Width: 54" wide
- put up in 30 yard rolls (**Diamante MQ** is 45 yard rolls)
- 29 oz. per sq. yd. (**Simtex** is 30 oz. per sq. yd.)
- UV stabilized pigments
- Mildew Resistant

NOTE: Photos enlarged to show pattern detail. See sample cards for accurate scale.

PERMACOOL™ TECHNOLOGY

Spradling has developed an innovative technology to ensure more comfortable surfaces. Permacool™ is a highly advanced reflective protection designed to reduce the amount of radiant heat absorbed by surfaces, improving the thermal sensation of upholstery during hot sunny days. You have to feel it to believe it! Designers and exterior seating manufacturers are no longer limited to selecting lighter colors.

With Permacool™ Technology, Spradling offers an expanded color palette making even dark surfaces cooler to the touch on sunny days.

SEAT & CUSHION UNDERLINING

- Face: 100% Polyvinyl Chloride
- Base: 3.20 Osnaburg Polyester/Cotton
- Width: 54” wide (137 cm)
- 9 oz. per sq. yd.
- Sold in 100 yard rolls

Seat and cushion underlining is highly breathable and designed to allow air to pass through so cushioning materials dry faster and do not hold moisture. A must have on any high quality marine seating project. Contains a broad spectrum biocide for excellent mildew resistance, rot resistance, and dimensional stability.

MAINTENANCE FOR RECACRIL® CANVASES

The high technology finish, Infinity Process provides the RECASENS canvases with a long lasting protection against mold and excellent water and oil repellency, making awnings protect you from both sun and water for many years. However, the accumulation of dust, air pollution particles, foreign organic materials and general dirt can damage this protection, shortening the life of the canvas so they must be eliminated.

The most effective method for maintaining canvases is to clean once a month with water with a low pressure hose, thereby, dirt accumulation into the fabric is avoided. It is very important that after cleaning with water, the canvas should be completely dry before rolling back the awning. In case of rain we can leave the awning open, since rain washes dirt. If for any reason you have to roll the wet awning, it must be unrolled as soon as possible and let it dry. In times of continuous rains is advisable to keep the awnings rolled. If this periodic water washing is done, in most environments, you only need make a process more thorough cleaning every 2 or 3 years.

The steps to follow are:

1. Brush off excess dust and dirt with a soft brush. NEVER brush with stiff brushes since damage the finish film tissue.
2. Spray the awning with clean water. If a hose is used, to avoid high pressure.
3. Prepare a solution of solvent-free soap in warm water (no more than 40 °C) and apply it on the awning, letting penetrate tissue.
4. Rinse with water to remove all traces of soap.
5. Let air dry and no wind the awning until the canvas is completely dry.

The Recacril® tarps are protected against the growth of fungi, however, whether fungi can grow on embedded dirt. To clean these stains are needed more intensive cleaning using the following procedure:

1. Brush off excess dust and dirt with a soft brush. NEVER brush with stiff brushes since damage the finish film tissue.
2. Prepare a solution with 10% household bleach, 20% of solvent-free neutral detergent and 70% water.
3. Apply the solution onto the fabric, leaving act between 15 and 20 minutes maximum.
4. Rinse with clean water several times, as if bleach residues will remain on canvas, with the combined action of the sun, could damage the fabric.
5. Allow to air dry and no wind the awning until the canvas is completely dry.
6. Repeat the process if necessary.

AWNING, SHADE & COVER FABRICS

RECACRIL® AWNING, SHADE & MARINE FABRICS

Recacril® canvases are high performance fabrics made from fade resistant solution-dyed acrylic fibers. Specially designed for awning and sun protection items. All manufacturing processes of spinning and weaving are optimized to give to the canvas a high tensile and tear strength, and to produce an excellent surface finish for applying the Infinity Process high-tech coating. The finishing Infinity Process is a proprietary finish that offers exceptional repellency to water and dirt, superior dimensional stability, and creates a durable fabric that keeps its aesthetic allure over the lifetime.

NOTE: ★ Solid Black is also available in 2 widths: 78" wide **(REC 78-103)** and 98" wide **(REC 98-103)**.

AWNING, SHADE & COVER FABRICS

RECSYSTEM® FR

★ Premium Colour

- 100% Solution-Dyed Acrylic Fabric
- Resin-coated finish (Weldable on one side)
- Water and fire resistant

RECsystem® FR is perfectly suited to meet the needs of awning manufacturers, distributors, architects and others working on projects that are required to meet fire safety standards such as hotels, schools, hospitals, and other public buildings. The fabric passes US standards NFPA 701, CSFM Title 19.

While specifically optimized for solar protection applications, RECsystem® FR is suitable for both indoor and outdoor use. Manufactured using the patented Recasens Infinity Process, the fabric possesses a high-tech finish that provides exceptional repellency to water and dirt along with a high resistance to mold and mildew as well as a one ounce clear back coating on the underside of the fabric that provides an added level of water resistance making the fabric nearly waterproof without affecting its appearance.

Construction Characteristics:	
Width	60 in.
Roll Size	65 yards per roll (60 meters/roll)
Weight	10 oz. per sq. yd.
Thickness	0.45 mm

RECWATER®

- Base: 50% Solution Dyed Acrylic, 50% PVC
- Finish: Embossed PVC coating (on one side)
- 100% Waterproof

The PVC coating is colored to match the color of the acrylic, making it possible to combine the elegance of the acrylic fabric with PVC's waterproof performance. The PVC coating is formulated to achieve perfect adhesion with the acrylic fabric. Unlike other products on the market, RECwater does not crack or roll and has excellent dimensional stability.

The PVC-free face is treated to achieve good water and oil repellency, while the coated side is engraved with a design that gives the PVC a fabric appearance. Being a heavier product and more resistant than RECacril®, makes RECwater® particularly suitable for boats that frequent areas with extreme weather conditions. It is also suitable for awnings in rainy climates.

Construction Characteristics:	
Width	60 in. ± 1%
Roll Size	65.6 yards per roll (60 meters/roll)
Weight	19 oz. ± 5%

	Warp	Weft
Tensile Strength	185 daN / 5 cm ± 5%	105 daN / 5 cm ± 5%

AWNING, SHADE & COVER FABRICS

TOP NOTCH® 9

TOP NOTCH® 9 is 60" wide, 9.0 ounces per square yard. 100% Solution Dyed Polyester fabric with a Fluorocarbon finish, resulting in a fabric that is breathable, reversible, and water repellent. Because the yarn is solution dyed, colour fastness is exceptional. TOP NOTCH® 9 can be used for many outdoor applications such as marine tops, trailer covers, awnings, gazebos, canopies, patio furniture and anywhere that a reversible and breathable fabric is needed.

TOP NOTCH® FR

TOP NOTCH® FR is 60" wide, 10 ounces per square yard and is a Solution Dyed 100% Woven Polyester flame retardant fabric (600 denier) utilizing a proprietary process to coat the bottom. Because it is Solution Dyed, fading will not be an issue. Its Flame Retardant properties allow it to pass California State Fire Marshal, NFPA 701, CPAI 84, and CAN/ULC-S109-03 specifications. TOP NOTCH® FR can be used for many outdoor applications such as tents, commercial and industrial awnings, canopies and many other useful applications.

AWNING, SHADE & COVER FABRICS

SUNTAINUM

- 100% Solution Dyed Polyester
- Highly water repellent, Ultraviolet & Mildew resistant
- Exceptional abrasion resistance
- Super strength
- Applications: Over-the-road travel covers, boat tops, mooring covers, splash curtains, enclosures, canopies, playground equipment covers, gazebo covers, BBQ covers, patio furniture covers

Suntainum is a 600 x 600 Denier construction with a Polyurethane coating on the back providing the perfect combination of water resistance and breathability. The solvent based PU coating stabilizes the weave so it is easy to cut and minimizes unravelling, shrinking or stretching. Solution dye means the fabric colours will not fade, bleed or migrate. This lightweight easy to use fabric is ideal for any shelter or protective application under rain or shine. Wash in lukewarm water with mild nature soap. Do not use solvents or detergents. Do not put in dryer.

MOTOR CITY CANADA COLLECTION

A collection of 4 automotive fabrics: **Alliston, Ingersol, Oakville, and Woodstock.**

Product Characteristics:

- 100% Polyester
- Width: 57" wide
- Lightfastness (AATCC 16A-64) - 300 hours
- **Alliston, Oakville, Woodstock:** 50 yards (45.72 meters) per roll
- **Ingersol:** 25 yards (23 meters) per roll
- **Ingersol, Oakville:** Abrasion Resistance - 30,000 double rubs
- **Alliston, Woodstock:** Abrasion Resistance - 15,000 double rubs

Manufactured to meet the F/R Requirements of:

- California Technical Bulletin 117 Section E (except **Woodstock** and **Alliston**)
- Motor Vehicle Safety Standard 302

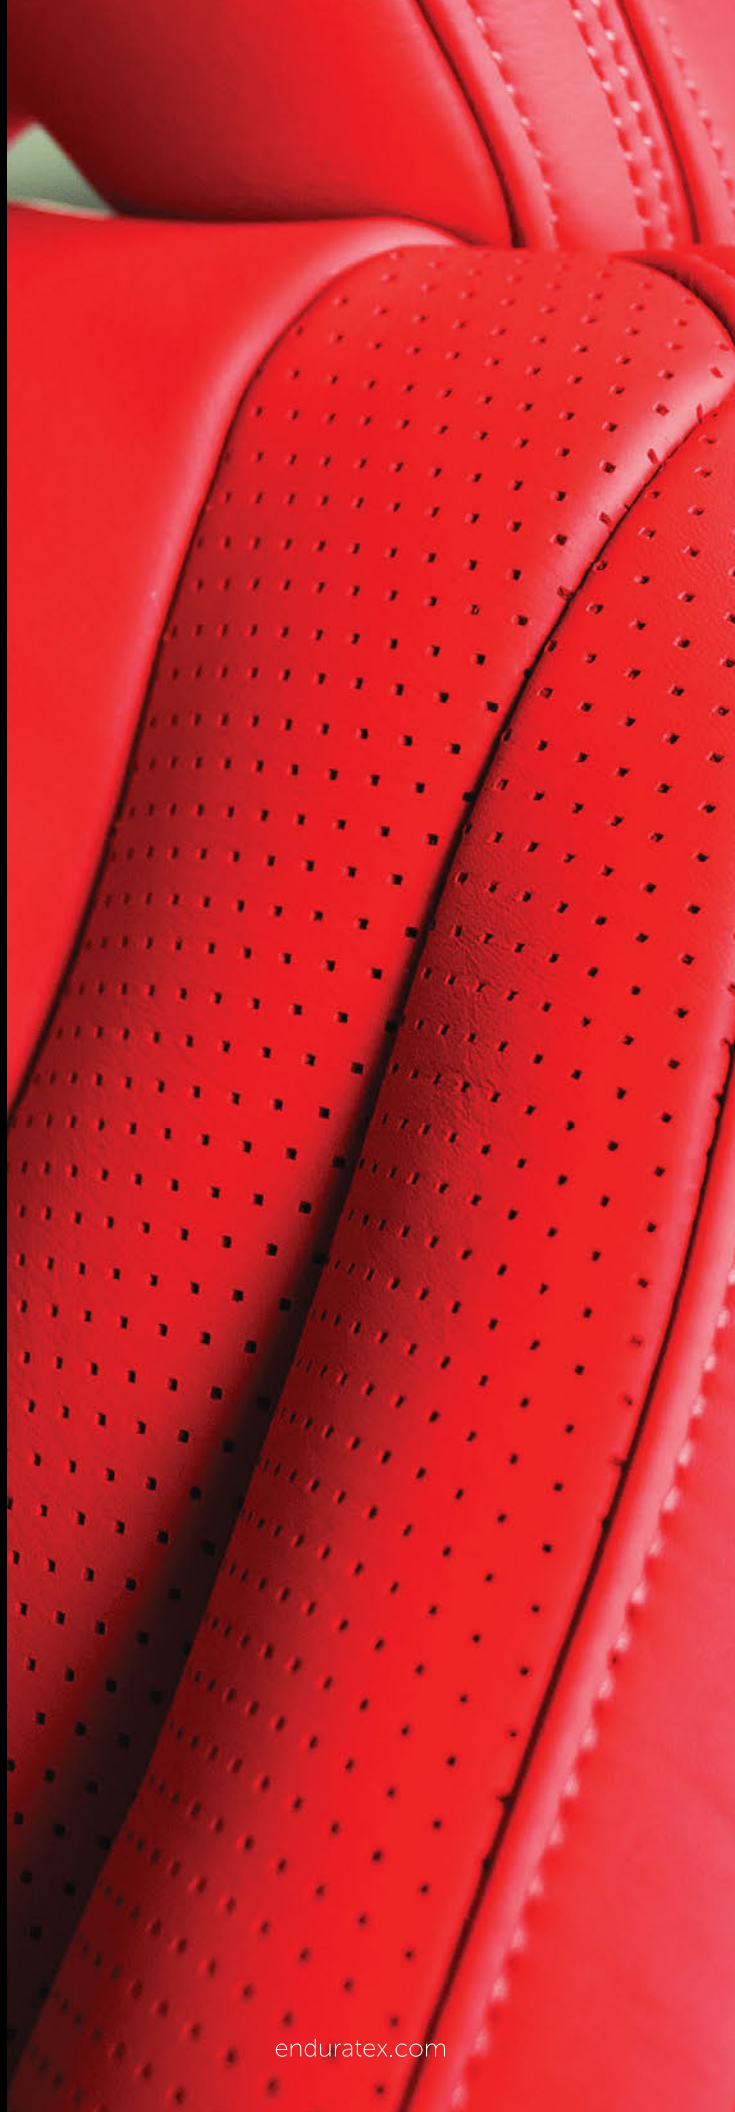
Endurasoft Core

BY ENDURATEX

HIGH PERFORMANCE COATED FABRICS FOR AUTOMOTIVE AND GENERAL APPLICATIONS



HIGH PERFORMANCE COATED FABRICS.

Upholsterers rely on Enduratex™'s Endurasoft CORE Collection for their complete automotive and general upholstery needs. Delivering exceptional performance and attractive designs, Endurasoft CORE offers:

- Multi-stretch capabilities for easy contouring and tailoring
- Q1 backing for softness and flexibility
- UV and fade resistance

STAIN RESISTANT.

FORBID

Endurasoft CORE is enhanced with FORBID™ SRT for superior stain resistance performance. Easily remove difficult stains such as ink, permanent marker, paint, mustard, red wine, coffee, blue jean dye, and more. FORBID™ SRT is durable and preserves the luster and integrity of your upholstery.

DURABLE. VERSATILE. BEAUTIFUL.

170 SKUs in a wide range of patterns and textures, matched to domestic and imported automotive OEM leather grains and colors. With so many options to choose from, your design choices are unlimited.

ENDURATEX™

We cover the world.

AUTOMOTIVE FABRICS

ENDURASOFT™ CORE COLLECTION

Featuring the Enduratex™ FORBID Coating (Exceptions: **Longitude, Phantom and Vaquero**)

The Endurasoft™ Core collection has all the popular automotive vinyls both original equipment styles and many of the popular aftermarket designs and colours. While designed and coloured for automotive use Endurasoft™ vinyls are also suitable for office, residential and general seating applications.

Brushed Aluminum, Carbon Fiber, Chainmaille, Corinthian, Doeskin, G-Grain, Hampton Perforated, Hampton Trim, Heidi, Honda, Longitude, Madrid, Mercedes, Milled Pebble, Montana, Monticello, Oxen, Phantom, Sierra, Sierra Leathermate, Soho, Vaquero, Verona, Wallaby

Product Characteristics:

- Face: 100% Polyvinyl Chloride
- Back: 100% Polyester
- Width: 54" wide (Except **Heidi** which is 61")
- 32 oz. per lineal yard (Exceptions: **Heidi** 36 oz., **Chainmaille and Vaquero** 30 oz., and **Phantom** 33 oz.)
- 1.02 mm thickness (Exceptions: **Chainmaille and Vaquero** 1.0 mm and **Phantom** 1.3 mm)
- Put up on approximately 30 yard rolls (27 meters)
- Abrasion Resistance: Exceed the heavy duty specification when tested using the Wyzenbeek method
- UV Resistance: Pass 500 hours QUV (Exceptions: **Chainmaille, Phantom and Vaquero**)
- Mildew Resistant, Heat Sealable (Exceptions: **Phantom**)
- Cold Crack: -23 °C
- All pass FMVSS 302

Morbern

Morbern is an
ISO 9001: 2015
Certified Producer
© 2022 Morbern Inc.
888-MORBERN
www.MORBERN.com

Leading manufacturers of decorative upholstery fabrics for over 50 years.

MORBERN AUTO COLLECTION

The Morbern Auto Collection offers a large assortment of automotive vinyls in a variety of colours and textures. While designed and coloured for automotive use, Morbern vinyls are also suitable for office, residential and general seating applications.

Corinthian, G-Grain, Heidi, Longitude, Madrid, Milled Pebble, Monticello, Oxen, Rawhide, Soho, Sierra, Verona, Wallaby

Product Characteristics:

- Face: 100% Polyvinyl Chloride
- Back: 100% Polyester
- Width: 54" wide (**Heidi** is 61")
- 32 oz. per linear yard
- 1.02 mm thickness
- Cold Crack: -23 °C
- Put up on approximately 40 yard rolls (37 meters)
- Abrasion Resistance: Exceed the heavy duty specification when tested using the Wyzenbeek method
- UV Resistance: Pass 1000 hours QUV
- Mildew Resistant
- Heat Sealable

Manufactured to meet the F/R requirements of:

- California Technical Bulletin 117, Section E
- Meets FMVSS 302
- UFAC Class 1
- BIFMA Class A/NFPA 260A

TRUNK LINING

- Width: 54” wide (137 cm)
- 50 yards per roll (45 meters/roll)
- Random non-linear pattern won’t “grin”
- Resists stain, soiling, mold and mildew
- Easy to cut, fit and mold to desired shape or size

Compartment liner for RV and marine uses made of 100% Solution Dyed Polypropylene.

TL BLACK

TL CHARCOAL

TL GREY

THERMOPAD & THERMOPAD PLUS

- ⅜” thickness
- Width: 48” wide (122 cm)
- 25 yards per roll (22.86 meters/roll)
- Thermal Conductivity (K): 0.28
- Thermal Reflectivity (R): 1.3
- Noise Reduction Coefficient: 0.30
- Meets the flammability requirements of MVSS302

Thermopad, thermal-acoustic insulation, is made with Polyester Fibre with a laminated scrim reinforced foil on one side. Thermopad Plus has foil on both sides. The tough aluminum foil provides a radiant heat shield which can increase R values up to a factor of 4, depending on the distance from the heat source.

Auto trim shops and leading manufacturers of motor homes use Thermopad and Thermopad Plus as an acoustic and heat barrier for engine covers, generator housings, firewalls and other exhaust systems in all kinds of auto and marine applications.

MESH II

- Base: 100% Polyester
- Coating: 100% Polyvinyl Chloride
- Vinyl Coated Polyester
- Put up on approximately 50 meter rolls
- Applications: Boat cushions, umbrellas, tents, outdoor furniture, load covers, awning soffits, laundry bags, bug screens

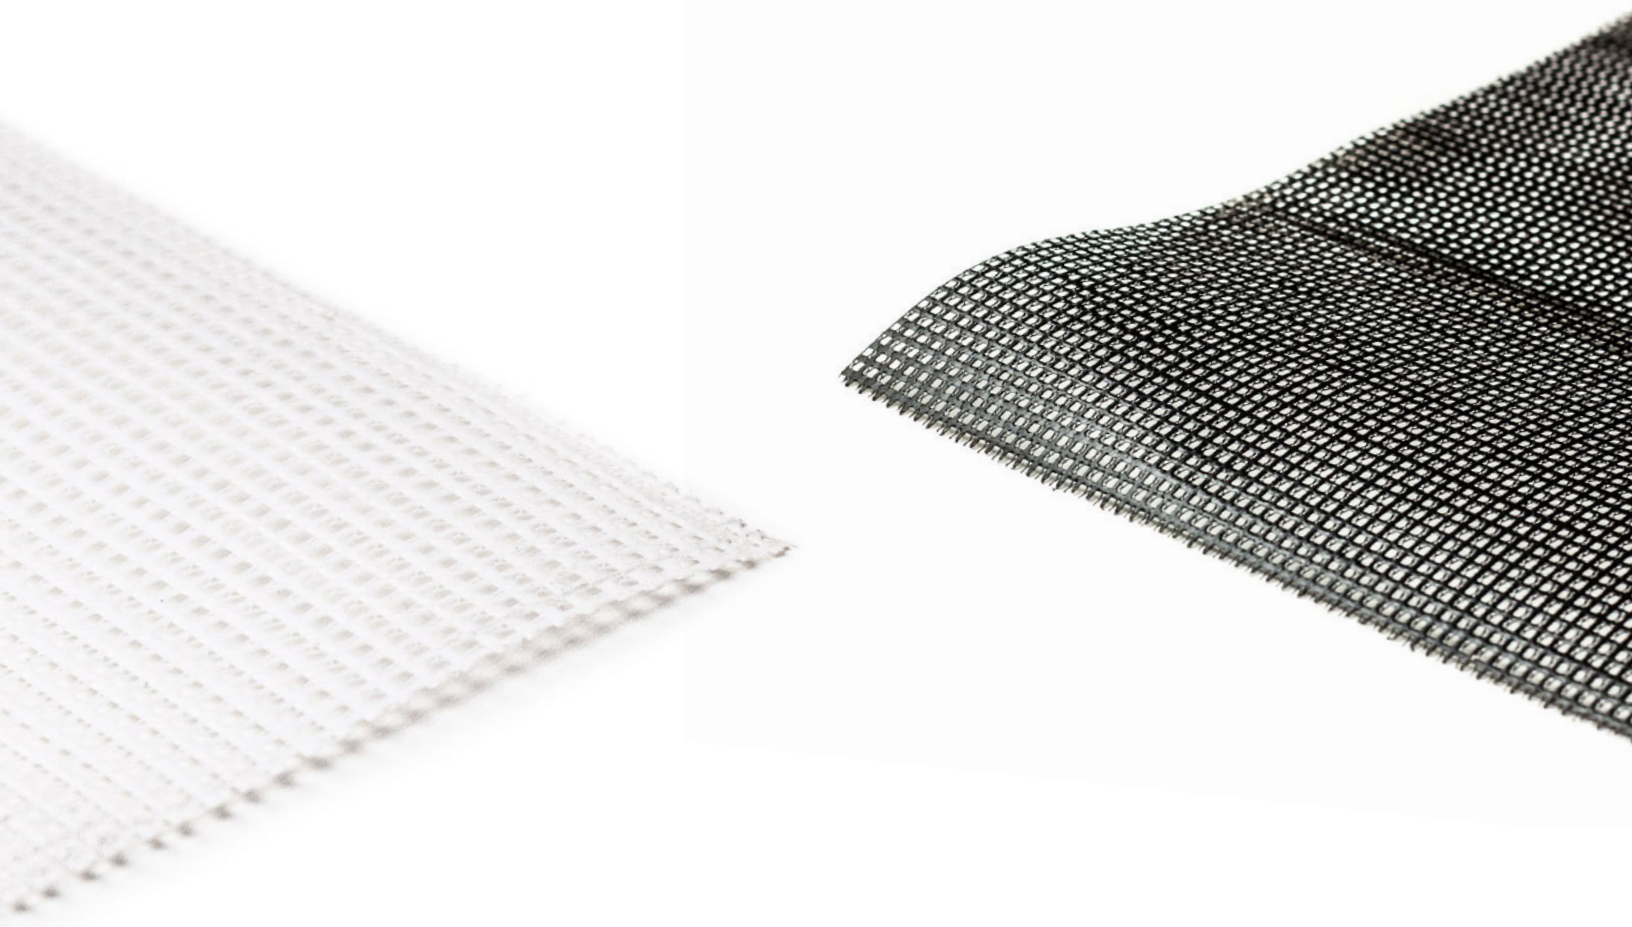
Product Characteristics:

- Weather and Rot resistant
- Abrasion resistant
- Heat sealable
- Excellent cleanability
- Tear resistant

Available in **Mesh II Black** and **Mesh II White**.

Construction Characteristics:	
Width	61 in.
Weight	8.5 oz. per sq. yd.
Denier Size	1000D x 1000D
Count	9 x 9

	Warp	Fill
Tensile	209 lbs/in	204 lbs/in



JACKSON

BUG SCREEN

- 100% Fibreglass Charcoal Black (Subject to availability; 100% Polyester alternative)
- Put up on approximately 100 ft. rolls (30.5 meter rolls / 33.33 yard rolls)
- Applications: Tents, gazebos, window screens

A mesh screening of woven fibreglass is a dimensionally stable product that will not shrink or stretch. It will not corrode and is unaffected by salt, air, smoke and fumes. It will not support combustion and is easily fabricated for windows and doors. Not recommended for swimming pool covers because of the effects of chlorine on the fabric.

Product Characteristics:

- Weather resistant
- Abrasion resistant
- Excellent cleanability
- Rot resistant
- Tear resistant
- ASTM D568-77 Section 1.4

PHIFERTEX® STANDARD MESH

- Open Weave Vinyl Coated Polyester
- Applications: Boat cushions, umbrellas, outdoor furniture and awnings

Phifertex® standard mesh is a unique open weave fabric made of PVC coated yarn and designed especially for extended outdoor life. As boat cushions, umbrellas, outdoor furniture and awnings, Phifertex® performs admirably. Regular maintenance of this vinyl coated polyester fabric helps ensure its long life.

To clean Phifertex®, vacuum or brush to remove dirt. Clean with a sponge or soft cloth dipped in a solution of 1 Tbsp. liquid dish detergent and 2 Tbsp. bleach in a gallon of water. Rinse thoroughly and air dry. Direct contact with suntan oils and lotions may cause accelerated aging of the fabric. If direct contact does occur, clean promptly.

Product Characteristics:

- UV resistant
- Mildew resistant
- Stain resistant
- Moisture resistant (quick drying)
- Abrasion resistant
- No shrinkage

Construction Characteristics:	
Width	54 in.
Weight	12 oz. per sq. yd.
Roll Size	approx. 60 yard rolls
Yarn Size	0.025
Count	17 x 11
Shade Factor	65%

	Warp	Fill
Tensile	365 lbs/in	295 lbs/in
Tear	75 trapezoid/lbs	55 trapezoid/lbs

Phifertex® is in compliance with the following flame retardant standards:

- National Fire Protection Association, NFPA 101, Class A rating
- Flame spread = 20, Smoke developed = 300
- Uniform Building Code, 1979 Part VIII, Chapter 42, Sections 4201-4205, Class 1
- State of California Title 4, Paragraph 1374, Technical Bulletin 117, Section E
- Fabric applicable commercial standard CS-191-53
- UFAC Class 1
- MVSS302

VINAGARD® V-CLEAR™

- Vinyl Laminated 100% Polyester Scrim
- Applications: Enclosures, curtains, covers, structures, pads and floor coverings

VinaGARD® V-Clear™ is a double coated heavy duty fabric suitable for applications where high strength protection and durability are required. It is UV stabilized, inherently flame retardant and may be sewn and dielectrically or thermally welded. V-Clear is ideal for covers, tents, pads and floor coverings.

Product Characteristics:

- Ultraviolet resistant
- Dielectrically & thermally weldable
- Rot, mildew & fungus resistant
- Dimensionally stable, shrink resistant
- Tear & abrasion resistant

Flame retardant for the life of the fabric passes:

- NFPA 701 1989 L
- CAN/ULC S109 L&S
- MVSS 302

Construction Characteristics:	
Width	54 in.
Weight	13 oz. per sq. yd.
Roll Size	approx. 50 meter rolls
Denier Size	1000 x 1000
Thread Count	2.76 x 2.76

V CLEAR 54

VINAGARD® 14

- Vinyl laminated 100% Polyester Scrim
- Applications: Protective covers, gymnasium mats and pads, divider curtains, stationary tarpaulins, gymnasium floor coverings

VinaGARD® 14 is a double coated heavy duty fabric suitable for applications where high strength protection and durability are required. It is UV stabilized, inherently flame retardant, resists internal and external mildewing, and may be sewn and dielectrically or thermally welded.

Product Characteristics:

- Ultraviolet resistant
- Dielectrically & thermally weldable
- Rot, mildew & fungus resistant
- Dimensionally stable, shrink resistant
- Tear & abrasion resistant

Flame retardant for the life of the fabric passes:

- NFPA 701 1989L
- CAN/ULCS109 L & S
- MVSS302
- CA 1237.1 small scale
- FAR 25.853 (A)

Construction Characteristics:	
Width	60 in.
Roll Size	approx. 50 meter rolls
Weight	14 oz. per sq. yd.
Cold Crack	-40 °C
Denier Size	1000 x 1000
Thread Count	9 x 9

- Applications: Protective covers, gymnasium mats and pads, divider curtains, stationary tarpaulins, gymnasium floor coverings, tents and structures, pool covers

VinaGARD® 16 is a double coated heavy duty fabric suitable for applications where high strength protection and durability are required. It is UV stabilized, inherently flame retardant, and resists internal and external mildewing. It has a top coat for cleanability and a high strength wick resistant base fabric.

Product Characteristics:

- Ultraviolet resistant
- Dielectrically & thermally weldable
- Rot, mildew & fungus resistant
- Dimensionally stable, shrink resistant
- Tear & abrasion resistant

Flame retardant for the life of the fabric passes:

- NFPA 701 1999 Test 2

- Vinyl Laminated 100% Polyester Scrim
- Applications: Protective covers, gymnasium mats and pads, divider curtains, stationary tarpaulins, gymnasium floor coverings, pool covers

VinaGARD® 19 is a double coated heavy duty fabric suitable for applications where high strength protection and durability are required. It is UV stabilized, inherently flame retardant, and may be sewn and dielectrically or thermally welded. The unique extrusion coating process provides flexibility.

Product Characteristics:

- Ultraviolet resistant
- Dielectrically & thermally weldable
- Rot & fungus resistant
- Tear & abrasion resistant

Flame retardant for the life of the fabric passes:

- CAN/ULCS109 L & S
- ASTM E 84 Class A CA 1237. 1 small scale

LEATHER

REGAL

★ Premium Colour

Regal is not like the typical top-grain protected leather you see on the market. Regal has a consistent hand that makes it a standout product. Regal hides are dyed for colour and then receive a compatible top coat that adds colour consistency and durability. Regal has a soft and supple hand, yet great for family rooms and high traffic areas.

45 sq. ft. per hide. Sold in full hides only.

SYMPHONY COLLECTION

The Symphony Collection is a collection of 3 patterns that can be used in Hospitality, Contract, Residential and Automotive Upholstery applications.

Glaze is a classic wet look pattern that looks and feels like a soft leather.

San Remo is a rich basket weave design with subtle shadings and detail that makes it look as if it is truly a woven leather.

Vintage is specifically formulated to emulate the appearance of fine waxed pull-up leather. It is designed to distress and lighten when it is sewn, tufted, stretched or creased.

Product Characteristics:

- Face: 100% Polyurethane
- Back: 50% Polyester / 50% Cotton

Manufactured to meet the F/R requirements of:

- MVSS 302
- BIFMA Class A
- UFAC Class 1
- NFPA 260

MOLD & MILDEW STAIN REMOVER

Colour & Fabric Safe! Removes mold, mildew, algae stain, bird droppings, spider droppings, tannin (leaf) stain, tree sap, tough dirt, grease and oil, some food and drink stains, blood stains and more. Recommended for use on awnings, tents, boat covers, canvas, cushions, carpeting, umbrellas, camping gear, inflatables, fabrics, vinyl, plastic and fiberglass. It is non-chlorine, biodegradable and has no harmful vapors.

One 12 oz. jar makes up to three gallons of solution.
The 65 oz. pail makes 16.25 gallons.

S 8467	12 oz. jar
S 8467-1	65 oz. pail

SEAM SEALER

IOSSO® Seam Sealer prevents most seams from leaking. Best for use on cotton, cotton blends, polyester and synthetic woven fabrics. Water repellency will vary with vinyl coated and vinyl laminated fabrics due to seam construction. It will not change the look or feel of the fabric. Ideal for boat covers, awnings, tents, backpacks, etc.

S 8468	4 oz. applicator bottle
S 8468-1	1 gallon

METAL POLISH

Removes oxidation, tarnish, surface rust, and water spots. Easy to use, just rub on, and buff off. May be used with a buffing wheel. Leaves a brilliant shiny protective coating that lasts for months.

Recommended for use on all metals, porcelain, plexiglass, hard plastics, and painted surfaces. Also removes black marks left from metal pots on ceramic or porcelain sinks. Use it on jewelry, sinks & faucets, silverware, musical instruments, buckles & badges. Great for removing the blue from motorcycle pipes.

3 oz. tube or 16 oz. tub.

S 8473	3 oz. tube
S 8473-1	16 oz. jar

JACKSON

VINYL & LEATHER CLEANER AND CONDITIONER

This special blend cleans and conditions in an easy spray & wipe formula. With the finest natural oils, it protects vinyl, leather, rubber. Great for clear vinyl windows. It restores appearance, natural feel and makes scratches less visible. It leaves a light gloss and protects against drying and cracking. If surface has mildew or other stains, use IOSSO ® Mold & Mildew Stain Remover prior to use of this product.

16 oz. spray bottle.

S 8469

WATER REPELLENT

Effective on all fabrics including Recacril® and other solution dyed acrylics. It protects from water, soil, oil, bird droppings, and environmental pollutants. Recommended for use on awnings, canopies, canvas, tents, patio furniture, cushions, umbrellas, spa covers, tarps, boat covers, bimini tops, hunting fabrics, camping gear, leather, synthetics, and vinyl. Formula is non-solvent and non-silicon.

The 32 oz. bottle covers approximately 37 square feet. One gallon covers up to 150 square feet. The one gallon concentrate makes 5 gallons.

S 8470	32 oz. bottle
S 8470-1	1 gallon ready to use
S 8470-2	1 gallon concentrate

CLEANERS & CONDITIONERS

FIBERGLASS RECONDITIONER

One Step - Restores and Protects. Restores color to faded fiberglass. Removes oxidation and chalking, water-line, water spots, tars and oils, and leaves a brilliant protective coating that lasts for months. There is no need to wax over IOSSO®. Because it does not contain silicone, it will not cause problems with refinishing at a later time.

A one pound (16 oz.) jar will clean a 30 foot boat from the waterline up.

S 8472

IOSSO® CARE KIT

Includes four 4 oz. bottles. (1) each of:

- Vinyl, Leather Cleaner & Conditioner
- Seam Sealer
- Water Repellent
- Mold & Mildew Stain Remover

S 8497

E-Z SNAP ZIPPER & SNAP LUBRICANT

For snaps, zippers, hinges and hardware. Lubricates, waterproofs, and reduces friction. It keeps snaps from corroding and locking up. It keeps zippers free flowing. E-Z Snap will not rinse away or dissipate in hot weather. The formula is non-hazardous, and does not contain solvents, silicone or Teflon. 1.5 oz. tube.

S 8471 1.5 oz.

S 8498 DISPLAY CASE

IMAR™ STRATAGLASS™ PROTECTIVE CLEANER #301

This cleaner is uniquely formulated to clean, shine and protect Strataglass™ and the Strataglass™ scratch resistant protective coating. Special UV inhibitors in IMAR™ Strataglass™ Protective Cleaner significantly extend the useful life of Strataglass™ by minimizing the deteriorating effects of sunlight. This helps defeat the common problem of age induced brittleness and promotes continued flexibility. This cleaner is safe to use daily and is recommended to be used often to properly maintain the famous clarity of Strataglass™.

16 oz. spray.

S 8430-1

IMAR™ STRATAGLASS™ PROTECTIVE POLISH #302

This polish is a polymer based product specifically formulated to safely clean, polish and protect Strataglass™ and the Strataglass™ scratch resistant protective coating. The trade secret ingredient of IMAR™ Strataglass™ Protective Polish is the molecular bonding that creates a nearly invincible protective barrier against the damaging effects of marine environment pollutants. This polish is recommended for use every 2 to 3 months. In areas of high fallout use every 4 to 6 weeks.

16 oz. bottle.

S 8431-1

IMAR™ YACHT SOAP CONCENTRATE #401

This soap is formulated with a unique blend of surfactants to create its highly polished appearance. Its non-streaking, non-spotting formulation rinses clear and decreases drying time. IMAR™ Yacht Soap Concentrate avoids the use of harsh alkalis, acids and abrasives so it protects durable polishes while thoroughly cleaning. It is the perfect complement to your Strataglass™ Protective Cleaner and Strataglass™ Protective Polish.

16 oz. bottle.

Flexible Clear Marine Enclosure Vinyl

Strataglass is a flexible press-polished vinyl sheet engineered with VueShield™ to resist scratching, UV degradation, and chemical damage in the harsh marine environment.

STRATAGLASS™

Strataglass™ is a premium, flexible vinyl sheet engineered to resist the damaging effects from both the sun's rays and scratching from handling. The difference between rigid PVC and flexible PVC is a chemical called plasticizer. The more plasticizer, the more flexible the vinyl. However, over time this plasticizer migrates to the surface and gets washed or wiped away. This process is accelerated by the sun. Little by little, flexible PVC becomes rigid, yellow and cloudy. Eventually you can no longer see clearly through the vinyl. Unless of course your curtains are made of Strataglass™.

This revolutionary product contains a polymeric coating that seals in the plasticizer, keeping the curtain clear, scratch resistant and flexible, even when exposed to temperatures as low as -20 °C. Ideal for boat curtain, automotive window, tent and awning applications, where perfection of clarity and lack of distortion are demanded. 54" x 111" sheets.

CRYSTAL CLEAR 20/20

Produced by the makers of Strataglass™, Crystal Clear 20/20 is the largest, clearest, most consistent uncoated press polished vinyl sheet ever produced. With excellent UV stability, Crystal Clear will not cloud, yellow or crack providing phenomenal visual light transmission. Produced using the same painstaking process as Strataglass™, the superiority of Crystal Clear 20/20 is immediately obvious to the eye - no hazy blueness, no "fish-eye", no dimples, no distortions, and 17% larger than the leading-selling sheet. 54" x 111" sheets.

WINDOW VINYLS

STRATAGLASS™ WARRANTY INFORMATION

It is extremely important fabricators and vessel & car owners read and understand this information. We request fabricators provide owners with a copy of this information. We recommend using only IMAR™ Strataglass™ Protective Polish, IMAR™ Strataglass™ Protective Cleaner, and mild soap (preferably IMAR™ Yacht Soap Concentrate) on Strataglass™. We no longer recommend the use of any other products, regardless of the manufacturer's claims. Using any other product(s) may void the factory warranty.

WARNING

- Use of RAINEX on Strataglass™ appears to work for a short time but then dulls the surface and presents an "orange peel" effect. Do NOT use RAINEX.
- Use of cleaners, polishes, scratch removers, or any other product made for regular, uncoated vinyl will damage Strataglass™. Do NOT use these products.
- Do NOT handle Strataglass™ (or any vinyl) with sunscreen on your hands. This will permanently cloud the vinyl where handled.

GENERAL MAINTENANCE

- When new 3M Adhesive Remover may be used to remove glue left from fabrication. Final clean with IMAR™ Strataglass™ Protective Cleaner. We recommend using IMAR™ Strataglass™ Protective Polish as the final step in installation to provide a base of protection and a good watershed.
- For the customer we recommend using IMAR™ Strataglass™ Protective Polish every 2 to 3 months (every 4 to 6 weeks in areas of high fallout). In the interim, use IMAR™ Strataglass™ Protective Cleaner frequently.
- Note: All new vinyl can easily get impressions in itself. We recommend new enclosures be left in place to the extent possible. If completely removed, enclosures must be interleaved with either acid-free paper (available from framing shops) or old sheets (the best choice) to prevent "pooling" in the glass. Vinyl "seasons" over time and becomes less impressionable. Roll all curtains down and fasten in place nightly to keep perfect appearance.
- To clean flush thoroughly to cool the surface and rinse away environmental abrasives. Wash with IMAR™ Yacht Soap Concentrate, or other equally gentle and high quality soap. Do NOT use Simple Green, Orpine or any other harsh cleaner - they will dull the surface. Apply the soapy water to the clear vinyl section of the curtain with special purpose washing mitts or soft cotton cloths. Thoroughly rinse the soapy solution with fresh water and completely dry the curtains with a high quality chamois (Swobbit makes several tools to make these tasks easier.). Your clear vinyl curtains should be washed whenever your boat is washed.
- After washing the curtains, apply IMAR™ Strataglass™ Protective Polish sparingly with small, light circular motions using a soft cotton cloth. Allow the polish to dry and then remove with a clean soft cotton cloth. Finally, lightly buff to a sparkling shine. Done! For routine maintenance between polishing, use IMAR™ Strataglass™ Protective Cleaner. Insure the clear vinyl panels are free of abrasives. Very lightly mist a soft cotton cloth. Lightly and briskly rub a manageable sized area and then lightly buff dry with another clean cloth. Done! We recommend using IMAR™ Strataglass™ Cleaner at least weekly, but it's so fast and easy you may want to do it daily. You'll love the shine.
- Extensive experience has shown that actual damage to your Strataglass™ cannot truly be repaired. We no longer recommend a restoration process. If IMAR™ Strataglass™ Protective Polish cannot restore the clarity and shine it may be time to consider replacing the enclosures. We recommend you use our cleaning procedures from the beginning.

CLEAR WINDOW VINYL

- Cold crack: -29 °C
- Ultraviolet resistant
- meets FMVSS 302

ACCESSORIES

924 ADHESIVE TRANSFER TAPE

- Width: ½" wide
- 36 yards per roll
- 12 rolls per case

All purpose transfer tape with a good balance of initial adhesion and shear holding power. Great for temporary holding of fabric prior to sewing.

S 4308

969 HEAVY DUTY ADHESIVE TRANSFER TAPE

- Width: ½" wide
- 36 yards per roll
- 12 rolls per case

Very high initial adhesion and high tack. Provides a good bond to many plastics. Recommended for Recacril® fabric. Provides a temporary hold during sewing. Helps to prevent seam leakage.

S 4307

SEAMING TAPE

Jackson's re-vamped line of seaming tape has the tackiest bond of any transfer tape we've tested. The acrylic adhesive bonds well with all canvas and acrylic fabrics and will hold all your components in place during sewing.

Jackson's stocks ¼", ½", and 1" widths to accommodate all your sewing needs.

S 4313	¼"
S 4311-1	½"

TONNEAU / AWNING RAIL - ALUMINUM

Aluminum rail in a mill finish. Used to attach awnings or tonneau covers to vehicles, buildings or RV's.

Available in 8 and 16 foot lengths.

S 9010	16' length
S 9011	8' length

TONNEAU / AWNING RAIL - VINYL

A PVC extrusion, this vinyl awning/tonneau rail is non-corrosive and can be run around tight corners without the use of crimping tools. Only small amounts of heat are needed to bend or straighten. Mount using No. 6 x ¾" flat head screws. Pre-drill holes 2" to 2.5" apart for tight radiuses and 4" to 8" apart depending upon the configuration of the mounting surface.

Available in 8 and 10 foot lengths.

NOTE: 10 foot length is special order only.

S 9012	10' length
S 9013	8' length

INSERT WELT

- Natural off white colour
- 100 feet per roll

Used to attach fabric to awning/tonneau rails in place of rope headers to eliminate binding and tearing of fabric.

S 4463

VINYL RAIL WITH FLANGE

PVC extrusion with a flange that allows you to sew the rail to fabric. Accepts all our stock keder and insert welt. Stocked in black and white in 8" sections.

NYLON FITTINGS

BOAT VENT AERO

Boat Vent AERO SM is Vico Marine's first sew-in vent. Great to use where tenting with the Boat Vent 2 or 3 may not be an option (i.e. cockpit cover).

The louver front can be used to help prevent bees or rodents from entering the cover or just extra protection from heavy rain.

S 9299 BLACK

S 9299 WHITE

BOAT VENT II

Best way to support your cover in rain, snow, and icy conditions. Provides evenly distributed ventilation along the entire underside of the mooring cover. Provides a higher volume of airflow per square foot of cover, more than any other fixed-vent. Design maximizes airflow across the entire underside of the mooring cover. Changes in wind direction have no significant effect on vent performance.

S 9300

BOAT VENT 3

Boat Vent 3 is an improvement on Boat Vent II, which made its name in the marine industry over the last two decades through adding value to covered boats by venting and tenting, preventing mildew and mold. Molded from the highest UV inhibited plastic on the planet, it can be installed to virtually any boat cover.

Boat Vent 3 features four major improvements over Boat Vent II:

- 40% more venting
- Overhanging top to allow in less moisture
- 30 teeth on the washer for a better grip
- Ergonomic reversible nut for easy installation

S 9298

BOAT VENT 4 (SEWABLE)

Made from durable soft material, the vent is soft enough for sewing, but tough enough for the outdoor elements your boat cover will go through. For those who require a sew in style vent, this is your number one choice. Key features include screw-in style lead-in, removable top umbrella for easy access, and improved venting.

- Twist & hold design for fast and easy sewing
- Easy to remove top creates more efficient work area
- Low profile design
- Strong soft material with UV inhibitor
- Matte Finish
- Inside hole fits ¾" tube or Spline tip for improved fit
- Can be installed with our without reinforcement piece

SWIVEL BALL DECK HINGE

These Deck Hinges are made of 316 Stainless steel and are available for ⅞" or 1" tubing. These fittings will allow fabricators to make tapered frames that do not seize or bind when collapsed. The ball and socket design allow the top cap to rotate 360° with 80° of left to right movement off centre. The Deck Hinge slides onto a base plate and is locked into place with a quick release pin. The frame can be easily removed from the boat leaving only a very small base plate attached to the deck. These fitting all have the 2 set screw feature for superior holding power.

S 9252	⅞"
S 9254	1"

SWIVEL BALL JAW SLIDE

ZIPPERS

#8 VISLON® SEPARATING ZIPPERS BY YKK®

Durable YKK® zipper with Delrin® teeth molded on extra strong polyester tape. UV stabilized for superior colourfastness. Unique interlocking system keeps teeth firmly engaged. Engineered to withstand rugged marine and outdoor applications. Use on jackets, sporting goods, bags, luggage and anywhere a dependable zipper is required. Includes non-locking double pull metal slider.

LENGTH	BLACK	WHITE

YKK® VISLON® ZIPPERS

YKK® #10 and #8 Vislon® Separating Zippers are extremely strong and lightweight, and differ from conventional zippers because the “teeth” are made from Delrin® and the tape is polyester. Because of the unique properties of the Vislon® Zipper, it has a wide variety of industrial, consumer and military applications where environmental conditions reduce the effectiveness of metal zippers.

The Vislon® Zipper is corrosion resistant. The zipper is self-lubricating and operates smoothly despite mud, sand, etc. The colour is an integral part of the molding material, creating a finish that does not rub off, peel or chip. The Vislon® Zipper has excellent resistance to heat (up to 182 °C) and to cold (down to -50 °C) and melts at 248 °C, which is 65° higher than normal laundry temperature. Resistance to chemicals further extends the use for the Vislon® Zipper beyond the scope of conventional metal zippers.

JACKSON

ZIPPER JIG

Holds YKK® zipper sliders from #2.5 to #10.

Lower clamp securely holds zipper jig to your counter. Upper clamp is used for locking jig rod in any direction. Also allows you to put zipper on backwards. 5 ½" x 4 ¾" size is ideal for your workstation.

To use, simply place the slider, upside-down and facing forward, into the slot on the rod. Open the zipper back one or two inches and hold face down. Feed both sides evenly into the slider held by the rod, coming in at a 45° angle (not straight in). Pull forward and it's done! Sliders can also be inserted backwards on zippers if needed.

S 7400-1014

ZIPPER STOPS PLIERS

Made of high quality forged steel. Vinyl handles for easy gripping. Open spring. Designed to install any kind of stops on zippers. Hard to find in the market.

S 7400-1012

GROMMETS

HOLE CUTTERS

For many applications the self-piercing dies and grommets will work fine without the need to pre-pierce a hole. However, when the fabric is too thick or too strong, there may be a need for pre-piercing before the grommet application. Hole cutting dies fit all Jackson grommet presses.

GROMMET TOOLS

J-2 HAND PRESS

This heavy duty durable machine will provide years of professional performance.

- Soft handle grip. Easy to move.
- Unique lever design helps reduce the hand force required to apply grommets.
- Enlarged throat depth allows for more flexibility in the placement of your grommets from the edge of the material.
- Utilizes self-piercing grommets. Your hole is cut and set in one operation saving time and money.
- Interchangeable self-piercing dies.

S 7461

Technical Data:

Level Length	10 ¾"
Throat Depth (from center of die)	4 ¼"
Grommet Sizes	#0, #1, #2, #3, #5.5
Net Weight	21.5 kg (47.5 lbs)
Dimensions (H x W x D)	20 ½" x 7 ¾" x 12 ¼"

S 7461

J-3 HAND PRESS

This heavy duty machine is designed to apply especially large size #12 grommets. It is a reliable machine which doesn't require any extra pneumatic or electrical power. Its extra-long lever and force transfer mechanism are designed to generate high mechanical impact to apply large grommets.

- Perfect for tarpaulin and drapery applications.
- Extra-long lever and force transfer mechanism engineered to minimize the amount of hand force required.
- Interchangeable self-piercing dies.

S 7462

Technical Data:

Level Length	15 ¾"
Throat Depth (from center of die)	2 ¾"
Grommet Sizes	#0, #1, #2, #3, #5.5, #12
Net Weight	16 kg (35 lbs)

S 7462

JACKSON

J-S1 STROKING HAND PRESS

Hand power is all that is needed to initiate the built in spring mechanism and the rest is handled by the machine. This press offers similar comfort and precision of pneumatic or electric machines but at fraction of the cost.

Needs minimum hand press power and effort: The required stroking pressure is sourced by the spring system inside the machine. This makes the J-S1 very easy for anyone to use.

Adjustable stroking pressure level: The stroking power can be adjusted from the screw system located on the top of the machine for perfectly applied grommets.

Adjustable height: This allows you to work with a variety of materials. Perfect for working in a seated position. It can be free standing or bench mounted.

Interchangeable self piercing dies: All ClipsShop dies up to size #5.5 are compatible with the J-S1. This allows setting many different sizes of grommets by a simple die changing process which takes only seconds.

Utilizes self piercing grommets: Your hole is cut and set in one operation saving time and money.

S 7463

S 7463

Technical Data:

Throat Depth (from center of die)	5 ½"
Grommet Sizes	#0, #1, #2, #3, #5.5
Net Weight	21.5 kg (47.5 lbs)
Dimensions (H x W x D)	20 ½" x 7 ¾" x 12 ¼"
Stroke Force (max)	18 KN (1835 kgf)

THE GROMMET SNIPER™

The Grommet Sniper™, made exclusively to fit the J-2 hand press, lets users precisely space grommets ⅝" to 3" from the edge of their substrate and uniformly locate the distance between grommets from 2 ½" to 24" apart.

- Equal spacing & depth without marking.
- Easy to adjust. Can be locked into place using finger wing-nuts.
- Laser etched inch and metric markings.
- Easy to install or remove in seconds without any extra tool.
- Shiny finish. Rust free.
- Durable fixture. Made of steel.

S 7464

WARRANTY INFORMATION

George N. Jackson Limited warrants to the original purchaser all grommet setting machines to be free of defects in material and workmanship under normal and proper use for a period of (1) one year. Under this warranty defective machines should be returned to the nearest George N. Jackson distribution centre, freight prepaid. George N. Jackson Limited will repair or replace at our option the machine deemed defective and return it freight prepaid. This warranty does not cover machine dies. This warranty does not cover defects which are a result of misuse of the product. This warranty does not cover claims for incidental or consequential damages. This warranty is void if repairs are made or attempted by others.

JACKSON

RATCHET

Our quick-tie micro ⅛" ratchet fits all ⅛" rope. This newly designed micro ratchet is lightweight, durable and extremely tough. To use, just tug on the rope until it is tight, and tie off the remaining rope. To release, pull on the rope the same as when tightening it and release the trigger lock. This is the quickest and easiest way to tie down your cover. These ratchets are made specifically for outdoor marine use.

Use with **S 4505-4 BLACK** polyester cord (see **page 281**).

HOOK & LOOP

VELCRO® ONE-WRAP

- Width: ¾” (18mm) wide in cuts
- 22.86 meter (25 yard) rolls in Black only

Unique Velcro® wrapping system. Back-to-back hook and loop is designed to stick to itself. Perfect for wrapping sleeping bags, tents, electrical wiring, sails, medical casts, sporting goods or anywhere a temporary secure closure is required.

S 5500-18 BLACK

MVA #8 MOLDED HOOK

1” x 25 yards, in black, MVA #8 hook provides an aggressive closure for applications where strength is needed. A molded nylon "arrowhead" design with 180 hook elements per square inch.

Applications:

- High strength fastening
- Limited cyclability
- Engagement into open pore cell foams
- Compatibility with most of our standard loop tape

S 5550-25 BLACK

SOFT LOOP

- 100% Nylon
- Width: 1 ⅝” wide (41 mm)
- 25 yards per bag (22.86 meters/bag)

Used in automotive seat covers.
Works with most hook configurations.

S 4670

JACKSON

VELCRO® MARINE STRAP

Velcro® marine-grade straps make it easy to bundle, secure, and cinch cargo, fishing gear, nautical equipment, and more. Designed for outdoor use, UV and salt water resistant. Straps are fully adjustable and designed for years of reliable performance.

S 5490-18	1" x 18"
S 5490-36	1" x 36"

ALL PURPOSE STRAP

2"x 72" Velcro® Brand All Purpose Straps.
These fasteners cinch and adhere to itself for a firm hold.
Velcro® Brand straps are easily adjustable and reusable.

S 5491

STAPLERS & STAPLES

JACKSON STAPLERS

We have worked very closely with a large ISO 9001:2000 certified pneumatic tool manufacturer to develop a lightweight stapler for use in the upholstery trades. Our goal - to have a stapler that is comfortable and easy to use. A stapler that will stand up to the demands of the professional user and a stapler that is affordable.

To use with staples listed on the next page.

S 7300 model uses the 7100 series staples
S 7301 model uses 1400 series staples

The JACKSON line of pneumatic staplers:

- Are lightweight, they weight less than 2 pounds to reduce operator fatigue
- Have a 360° adjustable exhaust to direct the air away from the user
- Have a rubber handle grip to reduce the vibration
- Incorporate a staple magazine that is all metal and the magazine release latch is located outside the grip area to prevent accidental opening
- Operate in a range from 60 to 100 PSI of air pressure
- Have a large easy to load magazine that can hold up to 180 staples
- Come with a small bottle of air tool oil and hex wrench
- Have a 6 month limited warranty - unlike other brands that only carry a 3 month warranty

S 7300

S 7301

STAPLE LIFTER

The correct angle for removing staples of any size, from the smallest to the long leg staples. Manufactured from alloy tempered steel. Electronically hardened working ends. Multi-sided handle to keep from rolling, made of easy to grip amber plastic.

S 7400-120.5

STAPLE REMOVER

Forged from 4140 alloy tempered steel, carefully hardened for lasting use.

- 3 prong for extra holding power
- 100 ft. coil
- 5 coils per box

Flexible 3 prong tacking strip for both inside and outside curves. Attach fabric to metal prongs and fold into place. Eliminates the need for hand sewing.

S 5691

HARD-FLEX TACK STRIP

- Width: ½" wide in approx. 15" diameter pancake rolls
- Approximately 364 feet per roll
- Approximately 2.5 lbs per roll

Very stiff to provide a perfect straight edge. Made from crushed fibre board. Sold by the pound in full rolls.

S 5699

TACK STRIP COVER

- Clear Polyethylene cover
- 1000 feet per roll

Used to slide over Punched Metal Tack Strips to help eliminate cuts in the fabric from any sharp edges on metal tack strip.

S 5697

JACKSON

PUNCHED METAL TACK STRIPS

- 10 oz. tack size

Also called Tacktite.

500 PIECES PER BOX

PADDING & PANELLING

LANDAU TOP PADDING

- Width: 60" wide (152 cm)
- White closed cell foam

Can be used over furniture frames to provide padding and protection on sharp edges or as a padding under landau top vinyls on cars.

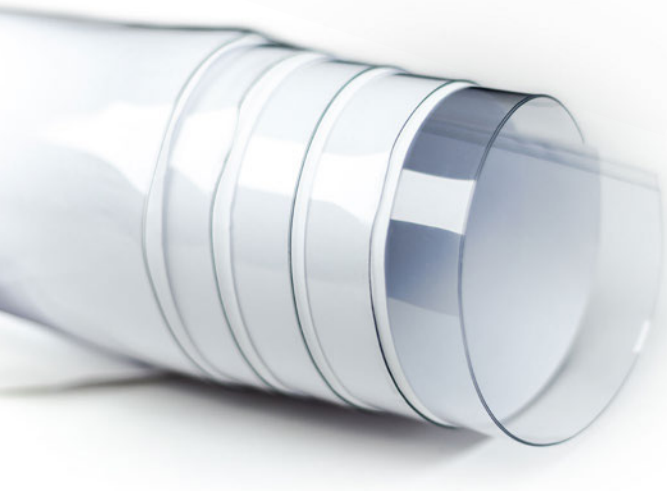
S 6245	⅛" thick	50 yards/roll (45 meters)
S 6246	¼" thick	20 yards/roll (18 meters)

HEEL PADS

- Heavy Black Vinyl Pad
- 9 ¼" x 17 ½"

Finish and protect your carpet installation with a heel pad.

S 6000-101

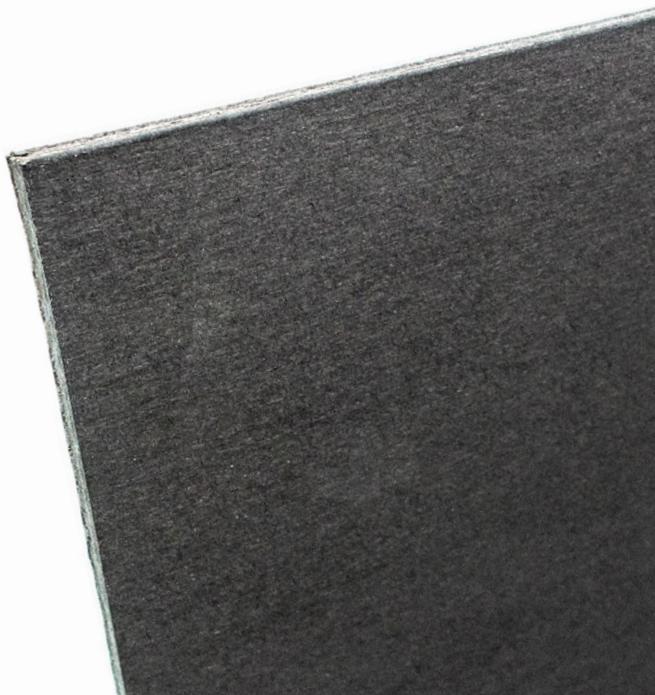


REGALITE

Pressed and polished PVC sheets.

Meets the requirements of Dept. of Transport AS-6 making them the perfect replacement for SUV and other convertible top window replacements. Very high quality marine window vinyl. UV resistant. 0.040 ga. super clear.

S 2201	24" x 54"	35/case
S 2203	29" x 68"	30/case



PANEL BOARDS

- Approximately 7/64" thick
- 0.010 Gauge
- 39" x 65"
- 12 per pack

Black solid chipboard. Used to make door panels, decorative trim panels, sunvisors and rear window decks in automobiles.

Sold in 1, 12 or 36 unit quantities.

S 6225

JACKSON

TONNEAU / AWNING RAIL - ALUMINUM

Aluminum rail in a mill finish. Used to attach awnings or tonneau covers to vehicles, buildings or RV's.

Available in 8 and 16 foot lengths.

S 9010	16' length
S 9011	8' length

TONNEAU / AWNING RAIL - VINYL

A PVC extrusion, this vinyl awning/tonneau rail is non-corrosive and can be run around tight corners without the use of crimping tools. Only small amounts of heat are needed to bend or straighten. Mount using No. 6 x ¾" flat head screws. Pre-drill holes 2" to 2.5" apart for tight radiuses and 4" to 8" apart depending upon the configuration of the mounting surface.

Available in 8 and 10 foot lengths.

NOTE: 10 foot length is special order only.

S 9012	10' length
S 9013	8' length

INSERT WELT

- Natural off white colour
- 100 feet per roll

Used to attach fabric to awning/tonneau rails in place of rope headers to eliminate binding and tearing of fabric.

S 4463

TAPES, SEALS, & WEBBING

LISTING TAPE

- 100 yards per roll (91 meters/roll)

Used to attach headliner. Made from percale cotton, biased and folded in half to finish 1 ¼" wide.

Sold by the roll.

S 4310

TACKING STRIP

- 50 feet per roll

Extruded vinyl tacking strips. Used in convertible top installation or can be riveted or screwed almost anywhere a tack strip is required.

Sold by the roll.

A	**S 2152**	Rear style	½" wide x ⅜" thick
B	**S 2153**	Front style	⅝" wide x ⅛" thick

SEAT BELT WEBBING

- 100% Polyester
- Width: 47 mm wide (1 ⅞")
- Approximately 219 yards per roll (200 meters/roll)

6000 pounds per inch break strength. Available in Black.

S 4870 BLACK

CONVERTIBLE TOP BOW PADS

To protect your top from wearing on the metal framework. Approximately 8.75" wide padded, fits most GM cars.

Sold by the pair.

S 2160

JACKSON

CLOTH WINDLACE

- ½" rubber core
- 15 yards per box (13.72 meters/box)

Original GM cloth windlace. Sold in full box only.

C **S 4221 BLACK**

D **S 4221 DK. GREY**

E **S 4221 GREY**

BULB SEAL

- Grips edges from 1/16" to 5/32"
- 50 feet per roll

Snap on windlace with ¾" black neoprene bulb. Used as a weather seal for doors and trunks.

F **S 4201**

SNAP-ON WELT

- Grips edges from 1/32" to 1/8"
- 100 feet per roll

Flexible plastic windlace with metal core and leather grain surface. For interior or exterior use.

G **S 4210 BLACK**

TRUCK SEAT WELT (J-WELT)

- Approximately 100 feet per roll

A sew-on welt that is used to attach cover material to air suspension truck seating and heavy equipment seats. Simply sew the welt to the cover fabric or vinyl and pull it over the lip on the seat to secure.

H **S 4460**

LINING & CARPET

TRUNK LINING

- Width: 54” wide (137 cm)
- 50 yards per roll (45 meters/roll)
- Random non-linear pattern won’t “grin”
- Resists stain, soiling, mold and mildew
- Easy to cut, fit and mold to desired shape or size

Compartment liner for RV and marine uses made of 100% Solution Dyed Polypropylene.

TL CHARCOAL

TL BLACK

TL GREY

MULTIPILE

- 100% Solution Dyed Polypropylene for good colourfastness
- Width: 40” wide (102 cm)
- 50 yards per roll (45.7 meters/roll)
- FR to the requirements of MVSS 302
- Resists stain, soiling, mold and mildew
- Non-woven carpet will not fray, unravel
- Random, non-linear pattern won’t “grin”
- Easy to cut, fit and mold to desired shape or size
- Plush, high-pile surface
- OEM construction

Automotive trim for cars, van, trucks, and RV’s. 80” width and additional colours (**Dark Charcoal** and **Silver**) available by special order only, approx. 4 week delivery. Full rolls only. Stocked in **Black** and **Charcoal**.

JACKSON

DETROIT

- 100% Nylon loop pile
- Width: 40" wide (102 cm)
- 50 yards per roll (45.7 meters/roll)
- FR to the requirements of MVSS 302
- Resists stain, soiling, mold and mildew
- Loop pile surface
- OEM construction

Automotive trim for cars, van, trucks, RV's.

THERMOPAD & THERMOPAD PLUS

- ⅜" thickness
- Width: 48" wide (122 cm)
- 25 yards per roll (22.86 meters/roll)
- Thermal Conductivity (K): 0.28
- Thermal Reflectivity (R): 1.3
- Noise Reduction Coefficient: 0.30
- Meets the flammability requirements of MVSS302

Thermopad, thermal-acoustic insulation, is made with Polyester Fibre with a laminated scrim reinforced foil on one side. Thermopad Plus has foil on both sides. The tough aluminum foil provides a radiant heat shield which can increase R values up to a factor of 4, depending on the distance from the heat source.

Auto trim shops and leading manufacturers of motor homes use Thermopad and Thermopad Plus as an acoustic and heat barrier for engine covers, generator housings, firewalls and other exhaust systems in all kinds of auto and marine applications.

S 6104	Thermopad
S 6105	Thermopad Plus

STEREO

- 100% Solution Dyed Polypropylene
- Width: 72" wide (182.9 cm)
- 50 yards per roll (45.7 meters/roll)
- Random non-linear pattern won't "grin"
- Resists stain, soiling, mold and mildew
- Easy to cut, fit and mold to desired shape or size

Speaker cover fabric and compartment liner for RV and marine uses. Available in **Black** and **Tweed**.

CARPET UNDERLAY

OEM quality carpet underlay. Can also be used over springs in furniture and bedding. Meets the flammability requirements of MVSS302.

S 6100-36	27 oz.	36" wide	50 yards per roll (45.72 meters/roll)

CONVERTIBLE TOPS
TONNEAU COVERS
GLASS REAR WINDOWS
TOP BOOTS AND ACCESSORIES
PLASTIC REAR WINDOWS

We are one of Canada's leading distributors of Robbins Auto Top products. In addition to our wide selection of convertible tops and windows, we also stock a complete selection of installation aids including cables, wire-on welt, header strip rubber, bow pads and all the tools.

Ask your Jackson sales rep for our complete Robbins catalogue and sample binder.

In operation since 1943, the Robbins family has been committed to bringing convertible owners high-quality products that offer long-term value. Their expertise in the design, manufacturing and installation of convertible tops, glass and plastic windows, tonneau covers and related products is unmatched. They are the only aftermarket top manufacturer to pass the stringent Ford Q1 Quality Audit.

What Makes ROBBINS Better!

Robbins is committed to manufacturing the highest quality products offering peace of mind to installers and long term value to convertible owners.

Technical Support: Contact Doug Robbins: Phone 805-604-3200, then dial 2, or email support@robbinsautotop.com

ROBBINS Quality: They use the newest, most advanced Gerber Cutting technology, and only first quality toppings, original style components and finest custom workmanship, to manufacture their Convertible Tops, Glass and Plastic Windows and other products. Their goal is to build the highest quality products. They do not use second quality materials or inferior materials from non OEM sources. They also do not eliminate important design features due to tooling costs or difficulty to reproduce, as do most of their competitors.

Factory Designs Duplicated or Improved: Robbins evaluates factory designs and improves upon them when necessary/possible, to find solutions for problems in OEM tops such as wear spots or holes that result from OEM component design flaws. They add reinforcements, change the grain direction in which panels are cut, use superior manufacturing processes and duplicate original style extrusions and components in their products.

Heat Sealed Reinforcements: Robbins heat seals their reinforcements in many of their products for greater strength and prevention of shrinkage across the width of the product. Gluing is cheaper, but I'm sure you'll agree there is truth to the adage "you get what you pay for". Their skilled technicians are not new to the heat sealing process. They have decades of experience heat sealing reinforcements that won't bubble or fail over time, effectively increasing the service life of the product.

Labour Savings for Trimmers: Robbins products generally require less time to install due to pre-punched bolt alignment holes added to assure precise fit and top speed installation of Chrysler LeBaron and Sebring, Mustang, GM and other tops and glass windows. For many other tops and window assemblies they include alignment guide holes or marks for trimmers to correctly position top quarters for proper fit and reduced installation time.

Shops have reported saving 45 minutes to an hour installing Robbins' Mustang, LeBaron and Sebring tops; and as much as an hour and a half installing their Miata tops. They provide rivets and other hardware, and installation instructions for many of their products which saves shops time, that their competitors do not provide.

Glass Windows: All Robbins glass window assemblies are manufactured using first quality toppings from OEM suppliers, never seconds. They use PPG Glass, which complies with National Auto Glass Specifications (NAGS). They heatseal glass into their tops and glass window assemblies using the same techniques as GM, Ford, Chrysler and other OEM convertible manufacturers. They do not use silicone (as many of their competitors do) to install glass, which produces weak bonds.

They add reinforcements when necessary, use factory style extrusions, and carefully finish their glass window assemblies to provide quality, exceptional appearance, and long service life. They offer clear, tinted and tinted with heater/defroster glass as convertibles were originally equipped with.

Plastic Windows: Like their tops and glass windows, they use only full width, first quality toppings to manufacture their plastic window assemblies and never use second quality materials or small pieces sewn together. They use Regalite Ultralite B.U.B. and Solvay Draka sheets, never low quality, less expensive grades. They also duplicate original extrusions and fittings.

Finish and Detail: Robbins purchases full width cloth and vinyl binding materials run to their specifications, to make most bindings they use to finish their tops and other products. Their bindings are more supple and sew on easily without bunching around tight curves on tops. Tops made with conventional bindings bunch up in wrinkles when sewn around tight corners, and cannot match the finished appearance of bindings on their tops. Stitching in their products is held to a uniform length and they do not ship products with broken or erratic stitches.

Warranty Support: Their three year pro-rated warranty matches the warranty period offered for most new car manufacturers' convertibles, and trim shops know that if they encounter a problem with one of their products, that Robbins will stand behind them. Customer satisfaction is the number one goal of their warranty program, which is why Robbins warranty support is unmatched in the industry.

Innovation is part of Robbins' Heritage: Robbins has been granted a number of patents for their innovative designs, such as their Rainguard deck seam process for 1980-93 VW Rabbit and Cabriolet convertibles; and their Flex-Hinge extrusion for folding glass rear windows.

In 1994 Robbins invented the first top with glass window for 1990-97 Mazda Miata convertibles, offering Miata owners a top that is far superior to factory tops equipped with plastic window, for which they were awarded a U.S. Patent. Since August 2004 they have a Patent Pending for their new 2001-On BMW E46 headlining clip receptacles, making their 2714C the only aftermarket top that works with the BMW original headlining.

Testing and Quality Systems: For each lot of topping they receive, Robbins performs stretch testing, sew testing and heat seal testing. They test all lots of thread, plastic sheets and other critical raw materials before they can be used in their manufacturing. Robbins is the only aftermarket top manufacturer to pass the tough Ford Q1 Quality Audit. They are working to obtain ISO/QS 9000 quality system certification, and are committed to continuous improvement of their products and level of service.

DEFINITIONS TO HELP YOU KNOW YOUR FOAM

BOARD FOOT: is a piece of foam 1" x 12" x 12". Most foam is sold by the board foot. We price our sheets and rolls by the piece so you know exactly how much you are paying for a particular piece of foam. To calculate the board feet in a piece of foam: **Multiply the length x width x height and divide by 144.**

CUBIC FOOT: is a piece of foam 12" x 12" x 12" or 12 board feet. To calculate the cubic feet in a piece of foam: **Multiply the length x width x height and divide by 1728 or you can take the board feet and divide by 12.**

DENSITY: is the weight of material in one cubic foot of foam.

COMPRESSION: refers to the firmness of the foam. Also called the ILD or IFD.

ILD / IFD: ILD stands for Indentation Load Deflection. IFD is Indentation Force Deflection. These are the same thing. It is a measure of the amount of force required to compress a 4" piece of foam to 3". This is called the 25% ILD/IFD.

It is possible to have a high density very soft foam or a low density very firm foam. All foam will lose some of its firmness over time. The amount of this firmness loss is related to density. The higher the density the lower this loss will be.

POLYURETHANE

ULTRACEL®

Another proven foam product.

ULTRACEL® has a soft surface feel, together with a deep down firmness for exceptional support and comfort that won't bottom out. ULTRACEL® has some of the best compression set values in foam manufacturing. This means it won't flatten or loose it's shape. ULTRACEL®'s high performance cell structure means consistent feel from sheet to sheet.

ULTRACEL® passes the reduced burn rate requirements of the following regulations:

- California 117 Section A part 1
- FAR 25.853 (a)(1)(ii)
- MVSS 302
- CAN/CGSB-4.2 No.27.7

In addition, ULTRACEL® has been approved by B.C. Ferries for use in passenger seating. How well a foam maintains it's firmness over a period of time is determined in the laboratory using a Roller Shear Fatigue test. In this torture test, the foam is subjected to a massive rolling weight. Years of cushion wear and tear are accelerated into thousands of abusive test cycles.

In this vital performance area, ULTRACEL® foam samples measure 40% to 50% better than conventional foams of equivalent densities. This level of performance can help assure customers that the comfortable, attractive furniture and bedding they purchase will remain appealing through years of normal use.

ULTRACEL® foam is the first high support foam to measure up to and exceed the compression set resistance of conventional foam. In bedding this could mean less troublesome body impression and in upholstered furniture, fabric covers will be less likely to shift, twist and lose their fit.

ULTRACEL® is guaranteed against losing resiliency, altering it’s size or changing it’s shape to within 10% of the original standards, for a period of Fifteen (15) years from the date of purchase when used in residential furniture and bedding or Five (5) years from the date of purchase when used in commercial applications. This warranty covers replacement of foam only and does not cover claims for labour or incidental or consequential damages.

NOTE: Stock sizes vary by branch, call your closest Jackson Distribution Centre for details.

- Width: 60" wide (152 cm)
- White closed cell foam

Can be used over furniture frames to provide padding and protection on sharp edges or as a padding under landau top vinyls on cars.

S 6245	⅛" thick	50 yards/roll (45 meters)
S 6246	¼" thick	20 yards/roll (18 meters)

FOAM BOLSTERS

Can be used as bolsters or neck rolls.

Longer sizes can be made by gluing two pieces together. To add diameter wrap with ½" foam or a polyester cushion wrap. Made using 1236 foam.

F 6030	5" diameter x 22"
F 6031	7" diameter x 22"

BONDED POLYESTER

- ⅞ oz. per sq. ft.

Odourless and will not absorb moisture. Use as a cushion wrap, in back pillows, toss cushions and as outdoor furniture cushion fill. Thermally bonded, available in 2 weights. This is a reduce burn rate product that meets the requirements of California Technical Bulletin 117 Section C (1980).

Check local warehouse for stock sizes. Open all Vacuum Packed Poly on arrival. Allow 24 hours for it to fully expand. Rotate your stock.

F 6413	30"	4 oz. approx. 64 yds
F 6414	60"	4 oz. approx. 64 yds
F 6415	30"	8 oz. approx. 32 yds
F 6416	60"	8 oz. approx. 32 yds

LATEX FOAM

Pure latex foam is derived from the sap of the rubber tree (Hevea Brasiliensis). The sap is mixed with compounding ingredients and formed into different type of cushioning materials. Today, latex foam is regarded as the supreme cushioning material due to its high durability, resiliency and bacteriostatic properties. It is widely used in bedding and furniture markets around the world.

In high end furniture design, form often follows function. When it comes to cushioning materials, nothing follows form better than pure latex foam. Pure latex foam provides a unique balance of comfort and support not found in any other cushioning product.

Product Characteristics:

- Naturally derived from the rubber tree
- Soft surface feel with deep down support
- Environmentally friendly - naturally derived & biodegradable
- Anti-microbial, dust mite and mildew resistant
- No "motion transfer" across seating or mattresses
- Exceptionally durable, guaranteed for 20 years
- Manufactured using the Dunlop Process

Average Density:

Firm	4.74 lb Density (76 kg/mtr³)
Extra Firm	5.62 lb Density (90 kg/mtr³)

SEAT & CUSHION UNDERLINING

- Face: 100% Polyvinyl Chloride
- Base: 3.20 Osnaburg Polyester/Cotton
- Width: 54" wide (137 cm)
- 9 oz. per sq. yd.
- Sold in 100 yard rolls

Seat and cushion underlining is highly breathable and designed to allow air to pass through so cushioning materials dry faster and do not hold moisture. A must have on any high quality marine seating project. Contains a broad spectrum biocide for excellent mildew resistance, rot resistance, and dimensional stability.

INSTANT DRY CUSHIONING

Making cushions for outdoor or marine use has had its drawbacks. Traditional foam cushioning absorbs water much like a sponge and takes forever to dry. Until now, quick drying foam cushioning has been expensive. Instant Dry Cushioning solves all those problems.

Instant Dry Cushioning is perfect for any outdoor or marine application. Instant Dry's unique lace design allows water to flow right through it. The high density polyethylene fibre will not absorb moisture and air circulates freely throughout the cushioning speeding the drying process. In most cases the cushioning material will dry before the fabric covering it.

Instant Dry can be wrapped with polyester batting to give extra thickness and a high loft soft feel to the cushion without affecting the drying time. Polyester batting like our **F 6414** or **F 6416** will not absorb moisture and like Instant Dry, water flows through it.

Instant Dry does not support growth of moulds or mildew. Instant Dry cuts easily using the **S 7753** foam cutter or with any sharp knife and can be stacked to get make thicker cushions. We recommend using **S 8504** latex adhesive around the edges to glue sheets together. Latex adhesive is not affected by moisture and by using it just around the edges it will not affect the flow or water or air through the cushion. Instant Dry Cushioning is guaranteed for 5 years against loss of shape in residential use.

SHEARS

WISS® "INLAID" SHEARS

These are the finest quality shears you can buy. Inlaid Wiss® shears will cut easier, quicker and remain on the job longer. Manufactured from 100% USA drop-forged steel and guaranteed to your satisfaction. Wiss® inlaid shears are manufactured by welding high carbon steel blades to hot drop-forged steel frames. This superior combination of edge hardness and adjustability produces shears that cut better and last longer.

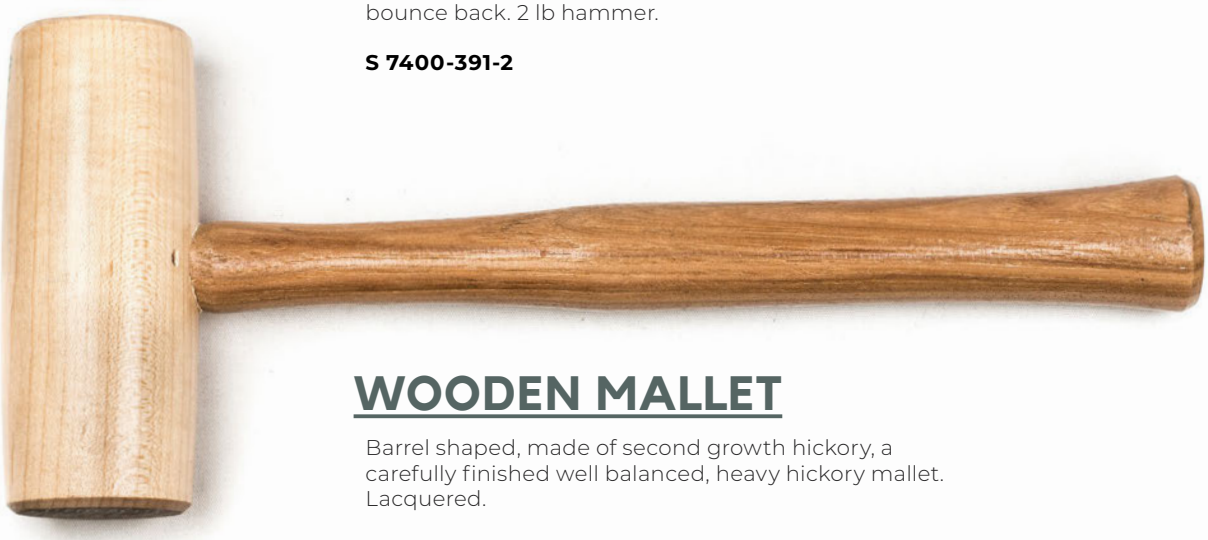
HAND TOOLS

DEAD BLOW HAMMER

Minimizes damage to the struck surface and controls force with minimal rebound. Head is filled with shot, which absorbs the impact of a strike reducing the bounce back. 2 lb hammer.

S 7400-391-2



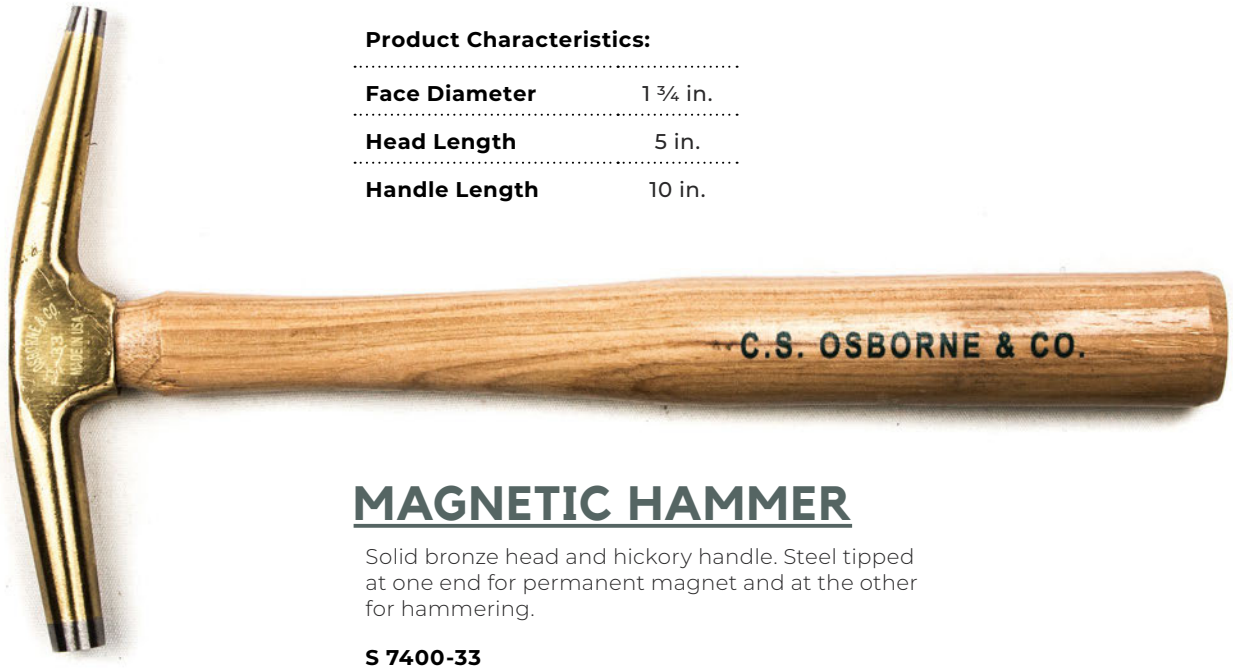
WOODEN MALLET

Barrel shaped, made of second growth hickory, a carefully finished well balanced, heavy hickory mallet. Lacquered.

S 7400-89.5-4

Product Characteristics:

Face Diameter	1 ¾ in.
Head Length	5 in.
Handle Length	10 in.



MAGNETIC HAMMER

Solid bronze head and hickory handle. Steel tipped at one end for permanent magnet and at the other for hammering.

S 7400-33

JACKSON

REPLACEMENT HANDLE

S 7400-222H

TUCKING TOOL

Used to tuck automotive headliner or upholstery fabrics behind trim, windows and doors. Sturdy wooden handle, metal blade.

S 7400-747

QUICKNAILER

Evenly spaces 5 nails at a time without damaging the furniture or your fingers.

S 7400-777

LUFKIN MEASURING TAPE

1'' x 25' measuring tape.

H 9000

60" ALUMINUM RULER

1 ½" wide, 5⁄64" thick. Light weight.

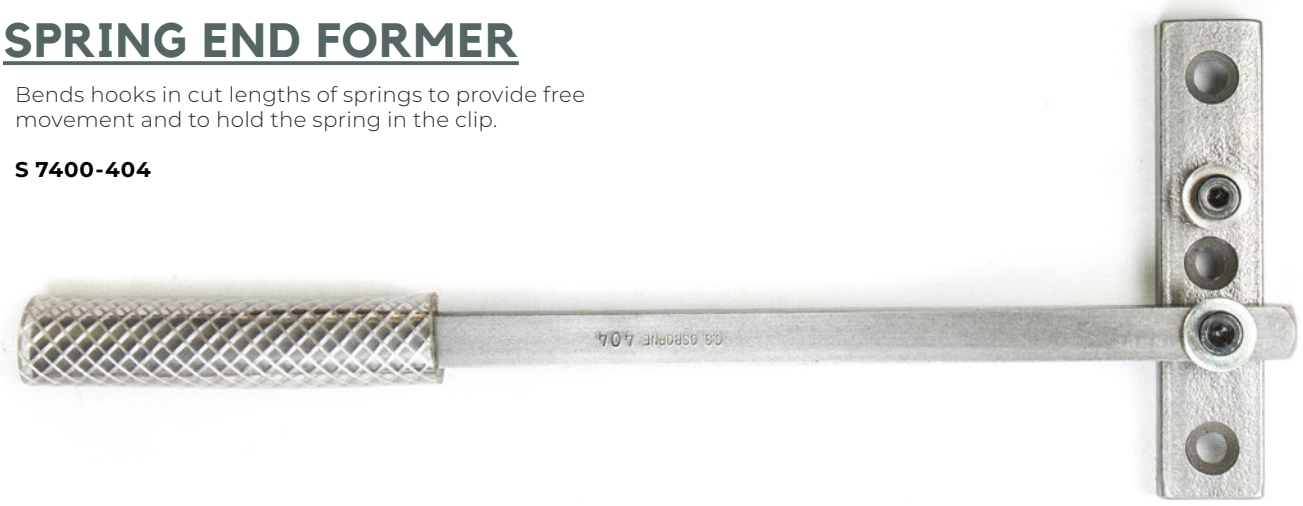
S 7400-161

HAND TOOLS

SPRING END FORMER

Bends hooks in cut lengths of springs to provide free movement and to hold the spring in the clip.

S 7400-404



GOOSE NECK WEBBING STRETCHER

Catches webbing close to the frame with plenty of leverage.
Equally efficient for left or right hand use.

S 7400-253

WEBBING STRETCHER

Webbing stretcher is made of hardwood maple with corrugated non-slip rubber at one end, and one row of 6 steel teeth at the other end.

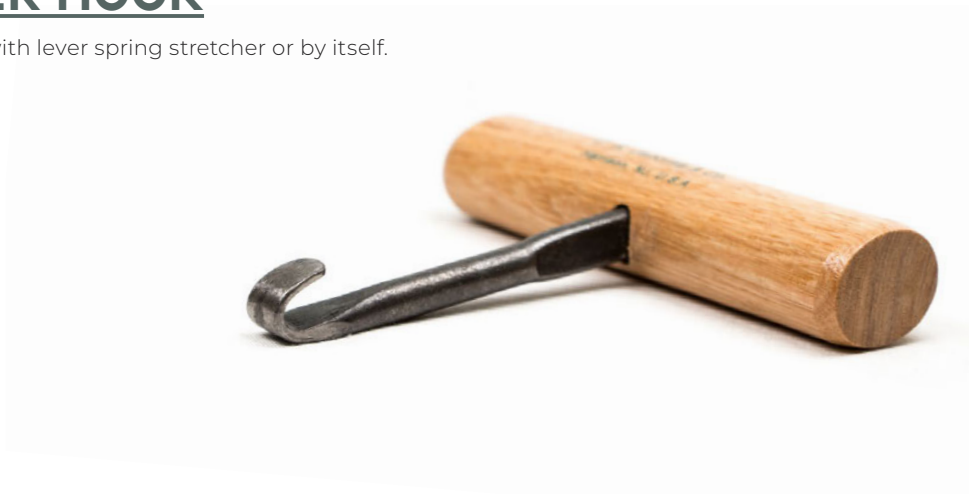
S 7400-255

JACKSON

SPRING PULLER HOOK

Can be used in conjunction with lever spring stretcher or by itself.

S 7400-297



LEVER SPRING STRETCHER

S 7400-268

PLIERS

ZIPPER JIG

Holds YKK® zipper sliders from #2.5 to #10.

Lower clamp securely holds zipper jig to your counter. Upper clamp is used for locking jig rod in any direction. Also allows you to put zipper on backwards. 5 ½" x 4 ¾" size is ideal for your workstation.

To use, simply place the slider, upside-down and facing forward, into the slot on the rod. Open the zipper back one or two inches and hold face down. Feed both sides evenly into the slider held by the rod, coming in at a 45° angle (not straight in). Pull forward and it's done! Sliders can also be inserted backwards on zippers if needed.

S 7400-1014

ZIPPER STOPS PLIERS

Made of high quality forged steel. Vinyl handles for easy gripping. Open spring. Designed to install any kind of stops on zippers. Hard to find in the market.

S 7400-1012

JACKSON

REVOLVING PUNCH

Six tube punch sizes: 5⁄64" - 3⁄32" - 7⁄64" - 1⁄8" - 5⁄32" - 3⁄16"

This punch is known as the best Revolving Punch made. The frame is made of forged steel, highly polished. Cutting tubes are turned from special carbon tool steel and threaded to allow easy replacement. These tubes are individually hardened. The reach or distance from the cutting tube to the back of jaw is 1 ½".

S 7400-223

WEBBING-CANVAS-LEATHER PLIER

Mated rounded teeth secure no-slip grip on leather or canvas.
Hammer jaw acts as a lever if a strong pull is required or it can be used as a hammer. Excellent tool for stretching leather, canvas or webbing.

3 ½" jaw width.

S 7400-250

3 PRONG CLIP PLIER

Use to fasten **S 3212** clips.

S 7400-445

PLIERS

B.W. CLIP PLIERS

This sturdy tool is especially designed for rapid closing of **S 3209** BW spring clips. Contoured handle for better grip.

S 7400-522

ANTIQUE NAIL PLIER

Easily removes antique nails from furniture.

S 7400-601

BENT HOG RING PLIERS

Made of forged steel with vinyl covered handles set at 135° to the jaw.
Closing spring holds hog ring in jaws while you position it.

S 7400-1440BC

JACKSON

STRAIGHT HOG RING PLIERS

Made of forged steel with vinyl covered handles.

STAPLE ACCESSORIES

STAPLE REMOVER

Forged from 4140 alloy tempered steel, carefully hardened for lasting use.

S 7400-124

STAPLE AND TACK CLAW

Ends are hardened and tempered to prevent breakage. Wooden handle. Designed with V-shaped notch to pull out tacks.

S 7400-201

STAPLE LIFTER

The correct angle for removing staples of any size, from the smallest to the long leg staples. Manufactured from alloy tempered steel. Electronically hardened working ends. Multi-sided handle to keep from rolling, made of easy to grip amber plastic.

S 7400-120.5

JACKSON STAPLERS

We have worked very closely with a large ISO 9001:2000 certified pneumatic tool manufacturer to develop a lightweight stapler for use in the upholstery trades. Our goal - to have a stapler that is comfortable and easy to use. A stapler that will stand up to the demands of the professional user and a stapler that is affordable.

To use with staples listed on **page 197.**

S 7300 model uses the 7100 series staples
S 7301 model uses 1400 series staples

The JACKSON line of pneumatic staplers:

- Are lightweight, they weight less than 2 pounds to reduce operator fatigue
- Have a 360° adjustable exhaust to direct the air away from the user
- Have a rubber handle grip to reduce the vibration
- Incorporate a staple magazine that is all metal and the magazine release latch is located outside the grip area to prevent accidental opening
- Operate in a range from 60 to 100 PSI of air pressure
- Have a large easy to load magazine that can hold up to 180 staples
- Come with a small bottle of air tool oil and hex wrench
- Have a 6 month limited warranty - unlike other brands that only carry a 3 month warranty

S 7300

S 7301

OTHER TOOLS

FOAM CUTTER

Economical alternative to high priced foam cutters. Large removable foot plate allows tool to stand on its own. Variable speed 0-3200 cycles. Powerful 3.2 Amp 120 volt electric motor features a one year replacement guarantee. One stationary blade and one moving blade for a straight even cut. 8" cutting depth. Shock absorbing base prevents bounce.

A	**S 7753**	Foam Cutter
B	**S 7754**	Extra Blade
C	**S 7754-1**	Blade Guide

U-CUT FOAM SLICER

Works like a band saw to cut foam horizontally from ¼" to 9" thickness. Up to 36" in width and unlimited length. U-Cut is fast, flexible and foolproof. Desired cutting thickness is quickly obtained by means of an adjustable screw setting. Extra blades available.

S 7400-410	Foam Slicer
S 7400-410B	Extra Blade

JACKSON

HEAT CUTTER

The ideal tool for cutting synthetic fabrics, webbing and rope.

Consistent cutting and edge sealing in one operation to prevent fraying. Designed for intermittent operation, the knife heats up in 6 - 8 seconds. Temperature is controlled by a convenient trigger switch. Blades heat up to 600 °C. Addition of the cutting foot allows material to be cut without using a special cutting base. Tool, blade and cutting foot all sold separately.

D	**S 7780**	Heat Cutter
E	**S 7781**	Blade
F	**S 7782**	Cutting Foot

118 SPRAY GUN

Syphon gun. New valve assembly lets you control the amount of liquid being applied by how far you pull the trigger. Use to spray silicone, adhesive or fabric protectors. Gun comes with aluminum liquid tube. To use with liquids containing Methylene Chloride you must switch to a stainless steel tube. This SS tube is available separately or in the replacement nozzle kit.

G	**S 7920**	Spray Gun
H	**S 7921**	Replacement Jar

HOLE CUTTERS

For many applications the self-piercing dies and grommets will work fine without the need to pre-pierce a hole. However, when the fabric is too thick or too strong, there may be a need for pre-piercing before the grommet application. Hole cutting dies fit all Jackson grommet presses.

GROMMET PRESSES

J-2 HAND PRESS

This heavy duty durable machine will provide years of professional performance.

- Soft handle grip. Easy to move.
- Unique lever design helps reduce the hand force required to apply grommets.
- Enlarged throat depth allows for more flexibility in the placement of your grommets from the edge of the material.
- Utilizes self-piercing grommets. Your hole is cut and set in one operation saving time and money.
- Interchangeable self-piercing dies.

S 7461

Technical Data:

Level Length	10 ¾"
Throat Depth (from center of die)	4 ¼"
Grommet Sizes	#0, #1, #2, #3, #5.5
Net Weight	21.5 kg (47.5 lbs)
Dimensions (H x W x D)	20 ½" x 7 ¾" x 12 ¼"

S 7461

J-3 HAND PRESS

This heavy duty machine is designed to apply especially large size #12 grommets. It is a reliable machine which doesn't require any extra pneumatic or electrical power. Its extra-long lever and force transfer mechanism are designed to generate high mechanical impact to apply large grommets.

- Perfect for tarpaulin and drapery applications.
- Extra-long lever and force transfer mechanism engineered to minimize the amount of hand force required.
- Interchangeable self-piercing dies.

S 7462

Technical Data:

Level Length	15 ¾"
Throat Depth (from center of die)	2 ¾"
Grommet Sizes	#0, #1, #2, #3, #5.5, #12
Net Weight	16 kg (35 lbs)

S 7462

GROMMET PRESSES

J-S1 STROKING HAND PRESS

Hand power is all that is needed to initiate the built in spring mechanism and the rest is handled by the machine. This press offers similar comfort and precision of pneumatic or electric machines but at fraction of the cost.

Needs minimum hand press power and effort: The required stroking pressure is sourced by the spring system inside the machine. This makes the J-S1 very easy for anyone to use.

Adjustable stroking pressure level: The stroking power can be adjusted from the screw system located on the top of the machine for perfectly applied grommets.

Adjustable height: This allows you to work with a variety of materials. Perfect for working in a seated position. It can be free standing or bench mounted.

Interchangeable self piercing dies: All ClipsShop dies up to size #5.5 are compatible with the J-S1. This allows setting many different sizes of grommets by a simple die changing process which takes only seconds.

Utilizes self piercing grommets: Your hole is cut and set in one operation saving time and money.

S 7463

S 7463

Technical Data:

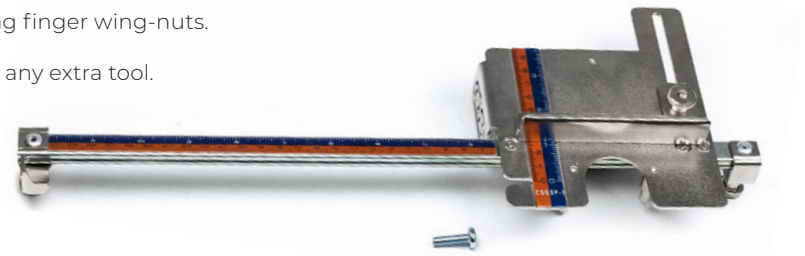
Throat Depth (from center of die)	5 ½"
Grommet Sizes	#0, #1, #2, #3, #5.5
Net Weight	21.5 kg (47.5 lbs)
Dimensions (H x W x D)	20 ½" x 7 ¾" x 12 ¼"
Stroke Force (max)	18 KN (1835 kgf)

THE GROMMET SNIPER™

The Grommet Sniper™, made exclusively to fit the J-2 hand press, lets users precisely space grommets ⅝" to 3" from the edge of their substrate and uniformly locate the distance between grommets from 2 ½" to 24" apart.

- Equal spacing & depth without marking.
- Easy to adjust. Can be locked into place using finger wing-nuts.
- Laser etched inch and metric markings.
- Easy to install or remove in seconds without any extra tool.
- Shiny finish. Rust free.
- Durable fixture. Made of steel.

S 7464



WARRANTY INFORMATION

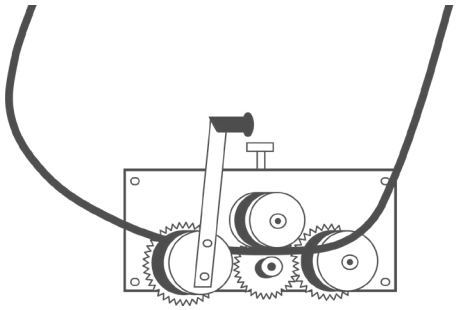
George N. Jackson Limited warrants to the original purchaser all grommet setting machines to be free of defects in material and workmanship under normal and proper use for a period of (1) one year. Under this warranty defective machines should be returned to the nearest George N. Jackson distribution centre, freight prepaid. George N. Jackson Limited will repair or replace at our option the machine deemed defective and return it freight prepaid. This warranty does not cover machine dies. This warranty does not cover defects which are a result of misuse of the product. This warranty does not cover claims for incidental or consequential damages. This warranty is void if repairs are made or attempted by others.

JACKSON

TUBE BENDER

CROWNARC TUBE CROWNER

The crank turns both lower wheels. This two wheel drive system makes control much easier. Crownarc is supplied with rollers cut for 1 ¼" diameter tubing. Easily crowns 1 ¼", 1", ⅞" or ¾" aluminum or stainless steel round tubing. An adapter kit is available to convert your crowner to crown 1" square tubing.



S 7692-2	Crownarc Bender
S 7692-1	1" sq Adapter Kit

BENDARC TUBE BENDER

Get beautiful, precise bends in aluminum or stainless steel tubing. Easy, pull down use. Wall mounting allows your body weight to help you. The scale and bend formula allows you to easily calculate your dimensions.

QUICK SWITCH roller, clamp and radius blocks are available to convert your Bendarc tube bender to almost any combination of ⅞" or 1" tubing in 6", 8", 10" or 12" radius. Older Bendarc tools will not accept QUICK SWITCH parts. QUICK SWITCH benders have bend arms made from square tubing with 3 or 4 holes for roller positioning.

NOTE: ★ Indicates stock items, all other are special order approximately 3 week delivery.

MAINTENANCE ON BENDARC & CROWNARC

BENDARC: Remove the roller from the handle. Spray the hole with a silicone suitable for use on plastics. Oil the clamp pivots and shaft with **S 8480** sewing machine oil. Remove the handle pivot and coat it with axle grease.

CROWNARC: Remove the 3 rollers. Use axle grease on the backs and holes of the steel gears and on the bronze bushings. Use **S 8480** sewing machine oil on the adjusting bolt threads.

MAINTENANCE SCHEDULE: Use the following as a guideline to how often you should perform the simple maintenance shown above.

- **50 Frames per year:** Maintenance yearly
- **50 to 150 Frames per year:** Maintenance twice yearly
- **Over 50 Frames per year:** Maintenance quarterly

SUNGUARD POLYESTER

SUNGUARD
UVR Bonded Polyester

SUNGUARD Polyester is twisted and bonded through a state-of-the-art bonding and dying process to ensure the highest quality of colorfastness and performance in the outdoor market. Special nanotechnology provides added strength resilient enough for awnings, marine enclosures, covers and upholstery, tarps, and other industrial applications. Every SUNGUARD product is also manufactured to meet anti-wick standards which reduces seam leakage.

American & Efird Canada, Inc.

A&E is the foremost manufacturer and distributor of premium quality industrial and consumer sewing thread, embroidery thread and technical textiles. Producers of apparel, automotive components, home furnishings, medical supplies, footwear and a diverse range of industrial products rely on A&E industrial sewing thread to manufacture their products. Through its global network, A&E's products are manufactured in 22 countries, distributed in 50 countries and sold in over 100 countries. A&E is a recognized industry leader in environmental sustainability and corporate social responsibility, and operates its global facilities with the utmost regard for the safety and health of its associates employed worldwide.

An Elevate Textiles Company

A&E operates as part of Elevate Textiles with worldwide operations in the United States, Mexico, and China. Elevate Textiles, a portfolio company of Platinum Equity, offers global textile brands including American & Efird, Burlington, Cone Denim, Gütermann and Safety Components. With a global array of premium fabric and thread solutions focused on innovation, sustainability and quality craftsmanship, Elevate Textiles provides products that surround us every day and in all facets of life. We offer advanced, high-quality products and mission critical textile solutions across vast industries including fashion and functional apparel, footwear, military, fire, medical, athletic, automotive, aerospace, outdoor, and other specialty sectors. Elevate Textiles is committed to delivering solutions that protect and enhance our lives through its global manufacturing platform that includes 38 facilities across six continents and over 15,000 employees.

A&E continues to lead the industry in the area of sustainability.

In the area of environmental sustainability, A&E's **Eco•Driven**® mark is a symbol of A&E's continued commitment to Environmental Sustainability, which is manifested through the **Eco•Driven**® program.

CLOTH WINDLACE

- ½" rubber core
- 15 yards per box (13.72 meters/box)

Original GM cloth windlace. Sold in full box only.

A **S 4221 BLACK**

B **S 4221 DK. GREY**

C **S 4221 GREY**

BULB SEAL

- Grips edges from 1/16" to 5/32"
- 50 feet per roll

Snap on windlace with ¾" black neoprene bulb. Used as a weather seal for doors and trunks.

D **S 4201**

SNAP-ON WELT

- Grips edges from 1/32" to 1/8"
- 100 feet per roll

Flexible plastic windlace with metal core and leather grain surface. For interior or exterior use.

E **S 4210 BLACK**

½" RUBBER

- 50 yards per roll

Used for shimming and bolstering worn and shrunken weatherstrip around doors and trunks and in convertible top headers. Makes a very high quality welt. Available in Plain.

F **S 4433**

WELTS

INSERT WELT

- Natural off white colour
- 100 feet per roll

Used to attach fabric to awning/tonneau rails in place of rope headers to eliminate binding and tearing of fabric.

S 4463

LOOSE BACK WELT

- 5⁄32" Polyethylene welting
- Approximately 500 yards per roll

A very rigid cord that holds it's shape. Ideal for use in pillow backs or other applications where the welt helps hold the cushions shape.

S 4472

WELT HOLLOW PE

- ¼" diameter
- 1000 feet per roll

Use this hollow welt cord to add piping to marine seating and other upholstery projects. Made from heavy-grade but flexible plastic, the welting is built to last. Easly sew fabric around the cord and glue into the seams of the furniture for an elegant finish.

S 4500

STYLE 180 EMBOSSED WELT

- 6⁄32" diameter bead, ½" overall
- Approximately 100 yards per roll (91 meters/roll)

Pre-made vinyl welt features a split flange for easy tailoring and workability. U.V. stabilized. Excellent for marine and automotive seating.

S 4440-9	Black
S 4440-1	White

KEDER WELT

Heavy-duty polyester welded to PVC. Used to attach fabric to PVC and aluminum rail extrusions.

Stocked in 100 yard rolls.

S 4401 BLACK	7.5 mm	**S 4402 BLACK**	8.5 mm
S 4401 WHITE	7.5 mm	**S 4402 WHITE**	8.5 mm

WRINKLE MIST

This unique spray helps in removing wrinkles from fabrics and crush marks from velvets. Use on drapery and upholstery fabrics or on clothing to remove “static cling”. Removes creases and wrinkles making it easier to control pleating, folding and overall handling.

Safe for use on most fabrics but test on a small concealed area before applying to overall fabric. Do not use on fabrics treated with an F/R finish.

Available in 1 litre jug that you can use **H 6509** trigger sprayer to apply and a 4 litre refill.

H 6501	1 Litre	12/case
H 6504	4 Litres	4/case
H 6509	Trigger Sprayer	

SUPER SLIP SILICONE

Prevents buildup of heat and friction on work surfaces. Super Slip is a multi-purpose silicone lubricant and release agent. The fast drying and non-staining characteristics of Super Slip make it ideally suited for applications in drapery, upholstery and garment industries.

Available in 400 gram aerosol can and 20 litre pails.

S 8421	Aerosol	12/case
S 8421-2	20 Litre Pail	

FABRIGARD

Forms an invisible shield to waterproof and repel stains on canvas, rainwear, shoes, carpeting, auto interiors, furniture and velvet and suede fabrics. May effect the backing on some upholstery fabrics. Do not use on flock velvet fabrics.

Available in 300 gram aerosol,
4 litre can or 20 litre pail.

NOTE: 20 Litre Can is special order (3 week delivery).

Jackson high performance oil for cleaning and lubricating.
Available in 500 ml. bottle.
12 bottles per case.

S 8480

CLEANERS & CONDITIONERS

303 FABRIC CLEANER™

303's new technology cleaner is powerful enough for heavy degreasing, yet safe enough to wash fruits and vegetables. This product contains no soaps, detergents or solvents. Full strength or at a recommended dilution for a particular cleaning job, Non-hazardous, non-toxic, non-flammable, non-foaming, non-caustic, non-fuming, odorless.

Meets or exceeds EPA standards for biodegradability. Safe for all water-safe materials.

32 oz. spray, 6 per case.

S 8456

303 PROTECTANT™

FOR USE ON RUBBER, VINYL, FIBREGLASS, TIRES, PLASTIC AND LEATHER - DO NOT USE ON FABRICS

Up to 100% reduction in UV caused slow-fade with regular use. Can restore lost colour and lustre to faded surfaces. Lasts 4-10 times longer than the leading name brands.

S 8463	16 oz.	12/case
S 8464	1 gallon	4/case

303 HIGH TECH FABRIC GUARD™

Longest lasting fabric & carpet protector. Repels grease, dirt, water & oil based stains on all natural & synthetic fabrics. Specifically formulated for fabrics and carpeting exposed to the sun. Double UV sunscreen for maximum fade protection. Safe and effective on all fabrics — nontoxic and odourless.

S 8455	16 oz.	12/case
S 8454	1 gallon	4/case

303 MOLD & MILDEW CLEANER + BLOCKER™

Quickly removes mold & mildew stains on contact. Blocks mold & mildew stains from reoccurring. Does not contain bleach, leaves behind a fresh scent. Works on ALL water-safe surfaces, including vinyl & fabrics.

32 oz. spray, single or 6 per case.

CLEANERS & CONDITIONERS

MOLD & MILDEW STAIN REMOVER

Colour & Fabric Safe! Removes mold, mildew, algae stain, bird droppings, spider droppings, tannin (leaf) stain, tree sap, tough dirt, grease and oil, some food and drink stains, blood stains and more. Recommended for use on awnings, tents, boat covers, canvas, cushions, carpeting, umbrellas, camping gear, inflatables, fabrics, vinyl, plastic and fiberglass. It is non-chlorine, biodegradable and has no harmful vapors.

One 12 oz. jar makes up to three gallons of solution.
The 65 oz. pail makes 16.25 gallons.

S 8467	12 oz. jar
S 8467-1	65 oz. pail

SEAM SEALER

IOSSO® Seam Sealer prevents most seams from leaking. Best for use on cotton, cotton blends, polyester and synthetic woven fabrics. Water repellency will vary with vinyl coated and vinyl laminated fabrics due to seam construction. It will not change the look or feel of the fabric. Ideal for boat covers, awnings, tents, backpacks, etc.

S 8468	4 oz. applicator bottle
S 8468-1	1 gallon

METAL POLISH

Removes oxidation, tarnish, surface rust, and water spots. Easy to use, just rub on, and buff off. May be used with a buffing wheel. Leaves a brilliant shiny protective coating that lasts for months.

Recommended for use on all metals, porcelain, plexiglass, hard plastics, and painted surfaces. Also removes black marks left from metal pots on ceramic or porcelain sinks. Use it on jewelry, sinks & faucets, silverware, musical instruments, buckles & badges. Great for removing the blue from motorcycle pipes.

3 oz. tube or 16 oz. tub.

S 8473	3 oz. tube
S 8473-1	16 oz. jar

JACKSON

VINYL & LEATHER CLEANER AND CONDITIONER

This special blend cleans and conditions in an easy spray & wipe formula. With the finest natural oils, it protects vinyl, leather, rubber. Great for clear vinyl windows. It restores appearance, natural feel and makes scratches less visible. It leaves a light gloss and protects against drying and cracking. If surface has mildew or other stains, use IOSSO ® Mold & Mildew Stain Remover prior to use of this product.

16 oz. spray bottle.

S 8469

WATER REPELLENT

Effective on all fabrics including Recacril® and other solution dyed acrylics. It protects from water, soil, oil, bird droppings, and environmental pollutants. Recommended for use on awnings, canopies, canvas, tents, patio furniture, cushions, umbrellas, spa covers, tarps, boat covers, bimini tops, hunting fabrics, camping gear, leather, synthetics, and vinyl. Formula is non-solvent and non-silicon.

The 32 oz. bottle covers approximately 37 square feet. One gallon covers up to 150 square feet. The one gallon concentrate makes 5 gallons.

S 8470	32 oz. bottle
S 8470-1	1 gallon ready to use
S 8470-2	1 gallon concentrate

CLEANERS & CONDITIONERS

FIBERGLASS RECONDITIONER

One Step - Restores and Protects. Restores color to faded fiberglass. Removes oxidation and chalking, water-line, water spots, tars and oils, and leaves a brilliant protective coating that lasts for months. There is no need to wax over IOSSO®. Because it does not contain silicone, it will not cause problems with refinishing at a later time.

A one pound (16 oz.) jar will clean a 30 foot boat from the waterline up.

S 8472

IOSSO® CARE KIT

Includes four 4 oz. bottles. (1) each of:

- Vinyl, Leather Cleaner & Conditioner
- Seam Sealer
- Water Repellent
- Mold & Mildew Stain Remover

S 8497

E-Z SNAP ZIPPER & SNAP LUBRICANT

For snaps, zippers, hinges and hardware. Lubricates, waterproofs, and reduces friction. It keeps snaps from corroding and locking up. It keeps zippers free flowing. E-Z Snap will not rinse away or dissipate in hot weather. The formula is non-hazardous, and does not contain solvents, silicone or Teflon. 1.5 oz. tube.

S 8471 1.5 oz.

CLEANERS & CONDITIONERS

IMAR™ STRATAGLASS™ PROTECTIVE CLEANER #301

This cleaner is uniquely formulated to clean, shine and protect Strataglass™ and the Strataglass™ scratch resistant protective coating. Special UV inhibitors in IMAR™ Strataglass™ Protective Cleaner significantly extend the useful life of Strataglass™ by minimizing the deteriorating effects of sunlight. This helps defeat the common problem of age induced brittleness and promotes continued flexibility. This cleaner is safe to use daily and is recommended to be used often to properly maintain the famous clarity of Strataglass™.

16 oz. spray.

S 8430-1

IMAR™ STRATAGLASS™ PROTECTIVE POLISH #302

This polish is a polymer based product specifically formulated to safely clean, polish and protect Strataglass™ and the Strataglass™ scratch resistant protective coating. The trade secret ingredient of IMAR™ Strataglass™ Protective Polish is the molecular bonding that creates a nearly invincible protective barrier against the damaging effects of marine environment pollutants. This polish is recommended for use every 2 to 3 months. In areas of high fallout use every 4 to 6 weeks.

16 oz. bottle.

S 8431-1

IMAR™ YACHT SOAP CONCENTRATE #401

This soap is formulated with a unique blend of surfactants to create its highly polished appearance. Its non-streaking, non-spotting formulation rinses clear and decreases drying time. IMAR™ Yacht Soap Concentrate avoids the use of harsh alkalis, acids and abrasives so it protects durable polishes while thoroughly cleaning. It is the perfect complement to your Strataglass™ Protective Cleaner and Strataglass™ Protective Polish.

16 oz. bottle.

ADHESIVES & SOLVENTS

SELECTING THE RIGHT ADHESIVE

Selecting the right adhesive for the job is not an easy task. Adhesive selection will depend on the products being glued as well as the environment the adhesive will be exposed to. Here are some practical suggestions and some other helpful hints when choosing an adhesive. Remember the best way to find out if an adhesive is right for the job is to test it yourself.

AUTOMOTIVE USE

Heat is a big factor in gluing materials in a car. There is also a wide variety of substrate to adhere to. Here are some glues to try for some of the common automotive applications.

S 8585 / S 8593	Foam backed headliner
S 8585 / S 8501	Vinyl roofs
S 8585 / S 8593	Door panels, Carpet

MARINE USE

Moisture and heat are major factors to take into consideration for marine uses. Like automotive, there are a wide variety of substrates to adhere to. Here are some glues to try for some of the common marine applications.

S 8585 / S 8593	Foam backed headliner
S 8585 / S 8593	Vinyl headliner or hulliner
S 8585 / S 8593	Hulliners
S 8504 / S 8501 / S 8593	Vinyl flooring
S 8501 / S 8504 / S 8585 / S 8593	Carpet

VINYL TARPAULIN REPAIRS

Gluing to PVC is a real challenge. Plasticiser migration is a common problem that causes most adhesives to fail. **S 8566** the HH-66 adhesive resists Plasticiser migration and works well regardless of the temperature and weather extremes.

FOAM

Another really easy item to glue. Almost any adhesive we have will glue foam together. What you need to consider is the open time and the glue line. The open time gives you enough time to work and gives a high initial tack that will hold. Some adhesives dry and leave a solid seam or glue line. Depending on the application you may be able to feel the glue line when you sit down on it. **S 8578** provides good initial strength with sufficient working time and dry with a soft flexible glue line that you won't feel on the finished product.

ADHESIVE COLOURS

Many adhesives are coloured so you can see them better during application. The colour is only a dye and does not affect the performance of the adhesive. It is important to remember that adhesives will be absorbed by the materials being glued. This can cause the colour of the adhesive to bleed through the material. If you use a green glue it will show through as green, if you use pink it will show through as pink, etc. This is common with very light fabrics and many vinyls with heavy backing and generally in the lighter colours. To avoid this problem use a clear or neutral colour adhesive such as the **S 8585**.

ADHESIVES & SOLVENTS

SOLVENT

Non flammable solvent/cleaner. Use to dilute and clean **S 8578** foam and fabric adhesive.

4 Litre can, 4 cans per case.

S 8423

SOLVENT/CLEANER

Use to dilute and clean **S 8585** adhesives.

4 Litre can, 4 cans per case.

S 8427

S 8423 S 8427

HH-66 SOLVENT/CLEANER

Use to clean up or thin HH66 Adhesives. Can also be used to clean surfaces to be glued.

1 US Gallon (3.78 ltr.), 6 cans per case.

S 8466-2

HH-66 VINYL CEMENT

A superior quality fast drying, solvent-synthetic resin adhesive. Used extensively for bonding vinyl coated and vinyl laminated fabrics to themselves or to various materials. Outstanding for sealing or waterproofing stitched seams. Resistant to temperature and weather extremes, chemicals, oil, fuel and grease. Apply with brush or roller. A superior quality vinyl adhesive that really works.

Available in 227 ml. and 950 ml. brush top cans and 3.78 ltr. refills. To thin or clean use **S 8466-2** solvent.

S 8566	227 mL	12/case
S 8566-1	950 mL	12/case
S 8566-2	3.78 Ltr	6/case
S 8566-3	18.93 Ltr	

JACKSON

JAXON AUTO TRIM & MARINE TRIM CEMENT

Clear, sprayable synthetic elastomer developed especially to permanently adhere Landau tops. Provides a waterproof, heat resistant, non-staining bond on any common surface found in the automotive trade. Use cement to adhere vinyl tops, fabric to foam, headliners, door panels, carpets and more. Works on marine applications.

Maximum heat resistance of fully cured adhesive is 200 °F. To thin or clean use **S 8427** solvent.

3.78 Litre, 2 cans per case.

S 8585

MARINE & OUTDOOR CARPET ADHESIVE

High strength, water-based adhesive designed for the use in installation of marine carpet, most outdoor grade carpets and many vinyl and rubber products. Can be used on or below grade. Can be used over plywood, association grade particleboard, hardwood, concrete, aluminum and fiberglass. For vinyl and rubber, only use over wood. Not recommended for pressure treated wood.

S 8501

478 FOAM ADHESIVE

A premium quality adhesive which can be applied with conventional spray equipment to bond flexible urethane or latex foams to themselves, fabrics and other materials. On foam, this product provides fast tack adhesion and good tearing strength in seconds. Final bonds are strong, long lasting without dimples and provide a soft flexible glue line. It is nonflammable and contains no ozone depleting chemicals. Sprays well with no dripping. High solids gives higher yield with a lighter application. Green colour.

Use **S 8423** solvent for clean-up and to thin.

Available in 4 and 20 litre pails.

S 8578	4 Ltr	4/case
S 8578-2	20 Ltr Pail	
S 8578-2 CLEAR	20 Ltr Pail	

SPRAY ADHESIVES

470 FEATHER SPRAY

A high strength, high tack adhesive, ideal for bonding urethane and latex foams to themselves, fabrics, wood, rubber and metal surfaces. The unique "feather spray pattern" provides excellent coverage and a delivery rate that enables fast drying, resulting in strong and permanent bonds. Not for use on headliners or vinyl. Yellow colour.

375 gram aerosol can. 12 cans per case.

S 8570

393 HEADLINER & TRIM SPRAY ADHESIVE

This aerosol adhesive is recommended for applications that require high strength or high temperature or both. It is clear and non-yellowing. Use it on trim work, headliners, door panels or other difficult applications in the van conversion, motorhomes and manufactured housing industries.

393 Spray has a 3-way adjustable valve offering the user a web type spray pattern. This adhesive works well in marine applications to apply carpeting, hulliner or insulation. 393 adhesive is packaged for retail sale.

12 cans per case.

S 8593

504 LATEX ADHESIVE

A natural rubber latex adhesive used for bonding fabric, gimp to itself and foams. Extremely effective on numerous applications which require a water-resistant bond. Ideal for repairing canvas, burlap and marine flooring or carpets.

Easy to use 500 ml squeeze bottle. 12 per case.

S 8504

JACKSON

SEAMING TAPE

Jackson's re-vamped line of seaming tape has the tackiest bond of any transfer tape we've tested. The acrylic adhesive bonds well with all canvas and acrylic fabrics and will hold all your components in place during sewing.

Jackson's stocks ¼", ½", and 1" widths to accommodate all your sewing needs.

S 4313	¼"
S 4311-1	½"
S 4315	1"

924 ADHESIVE TRANSFER TAPE

- Width: ½" wide
- 36 yards per roll
- 12 rolls per case

All purpose transfer tape with a good balance of initial adhesion and shear holding power. Great for temporary holding of fabric prior to sewing.

S 4308

969 HEAVY DUTY ADHESIVE TRANSFER TAPE

- Width: ½" wide
- 36 yards per roll
- 12 rolls per case

Very high initial adhesion and high tack. Provides a good bond to many plastics. Recacril® fabric. Provides a temporary hold during sewing. Helps to prevent seam leakage.

11 GAUGE - FOR SEATS BACKS

S 3510-21.5	21.5" long

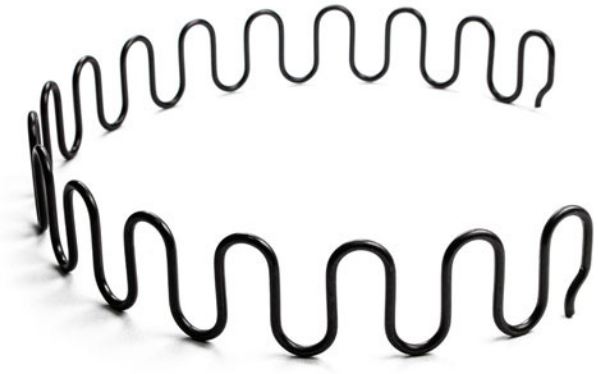
S 3808-24

BLACK LINE STANDARD LOOP CUT LENGTHS

The “basic” sinuous spring for upholstery operations. Cut to size for quick use. Ends are formed to prevent slipping in clips. Springs are painted black which make them cleaner to work with.

8 GAUGE - FOR SEATS

S 3808-22	22" long
S 3808-24	24" long
S 3808-26	26" long
S 3808-28	28" long



S 3808

BLACK LINE CONTINUOUS COIL

This sinuous spring has been a basic for upholstery operations since its introduction. Springs are painted black which makes them cleaner to work with.

8 gauge is used for seating applications.

11 gauge is used for seat backs.

S 3808	8 gauge	30 meters/coil
S 3811	11 gauge	30 meters/coil

JACKSON

BLACK LINE COIL SPRINGS

9 ga. Knotted One End coil springs. Springs are painted black which makes them cleaner to work with.

Sold in bundles of 1, 20 or 50.

S 3809-5	5" high	5 twist
S 3809-6	6" high	6 twist
S 3809-7	7" high	7 twist
S 3809-8	8" high	8 twist
S 3809-9	9" high	9 twist

S 3809-6

NO-SAG CONTINUOUS COIL

Also called Zig-Zag or Sagless. This sinuous spring has been a basic for upholstery operations since its introduction. 9 gauge is used for seating applications. 12 gauge is used for seat backs.

S 3509	9 gauge	120 feet/coil
S 3512	12 gauge	154 feet/coil

S 3509

S 3512

COILS

FURNITURE CONNECTOR

Connect sectional furniture or other pieces together. Hides out of view when pieces are separated.

Positive lock with quick release.

S 5900

EDGE WIRE

8 gauge straightened wire. Pieces are 134" long.

Sold by the piece.

S 3605

PAPER COVERED WIRE

- 3000 feet per roll

15 gauge wire wrapped in paper to eliminate spring squeak. Use across springs to prevent tipping and to spread the spring load.

Sold by the roll.

S 3606

PLASTIC COVERED WIRE

- 500 meters per roll

15 gauge wire coated with PVC to eliminate spring squeak.

Sold by the roll.

S 3607

JACKSON

SWIVEL ROCKER BASES

5 legs for exceptional stability. 2 heights available.
6 per case.

		OVERALL HEIGHT	FLOOR TO BASE
#2	**S 3905-2**	5 ½"	2"
#3	**S 3905-3**	7"	3 ½"

SWIVELS

Standard 360 degree turn swivel plates.

S 3930-7	7"	19/case
S 3930-10	10"	12/case

BED HELICOILS

Close wound heavy 11 gauge coils to attach deck to bed frame on hide-a-bed units.
Use 10 turn for ends and 13.5 turn for sides.
20 springs per pack.

S 3941	10 turn
S 3942	13.5 turn

SEAT HELICOILS

Close wound 15 gauge wire.
20 coils per pack.

S 3943	2"
S 3944	2 ½"
S 3946	3"

TACK STRIP

CURVE EASE

- Also called Pli-grip or Flex trim
- 3 prong for extra holding power
- 100 ft. coil
- 5 coils per box

Flexible 3 prong tacking strip for both inside and outside curves. Attach fabric to metal prongs and fold into place. Eliminates the need for hand sewing.

S 5691

HARD-FLEX TACK STRIP

- Width: ½" wide in approx. 15" diameter pancake rolls
- Approximately 364 feet per roll
- Approximately 2.5 lbs per roll

Very stiff to provide a perfect straight edge. Made from crushed fibre board. Sold by the pound in full rolls.

S 5699

TACK STRIP COVER

- Clear Polyethylene cover
- 1000 feet per roll

Used to slide over Punched Metal Tack Strips to help eliminate cuts in the fabric from any sharp edges on metal tack strip.

S 5697

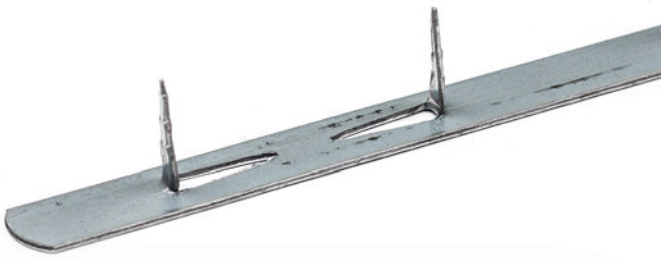
FASTENERS KLINCH

For joining coil springs to webbing. Quick and easy. Saves you time and money by eliminating the need to sew springs to webbing.

S 7400-7200

JACKSON

PUNCHED METAL TACK STRIPS



- 10 oz. tack size

Also called Tacktite.

500 PIECES PER BOX		100 PIECES PER BOX	
S 5692-24	24"	**S 5693-30**	30"
S 5692-27	27"		
S 5692-30	30"		

CARDBOARD TACK STRIP

- Cut lengths approximately ½" x 38"
- Approx. 25 lbs per bundle

Sold by the pound or bundle.

S 5696

BLUE STERILIZED TACKS

Our high quality tacks are sterilized for your protection. Sharp points and strong, thin oval heads are ideal for attaching all types of webbing, fabric and leather. With sturdy construction and blued finish to protect against rusting, these deliver quality and performance.

S 5610-3	⅜" length	1000/box
S 5610-6	½" length	1000/box
S 5610-12	11⁄16" length	1000/box

BED FRAMES & SPRINGS

ROCKER SPRINGS

- 7 gauge heavy duty springs
- 30 per case

Coils are permanently mounted in sturdy ribbed brackets engineered to allow maximum spring action without fatigue.

Sold by the pair (as shown in photo).

S 3920-7

JUNIOR ROCKER SPRINGS

- 8 gauge heavy springs
- 30 per case

This single spring unit has all the features of the regular rocker spring unit except it has only one spring. Designed for use on juvenile furniture where a heavy duty unit is not required.

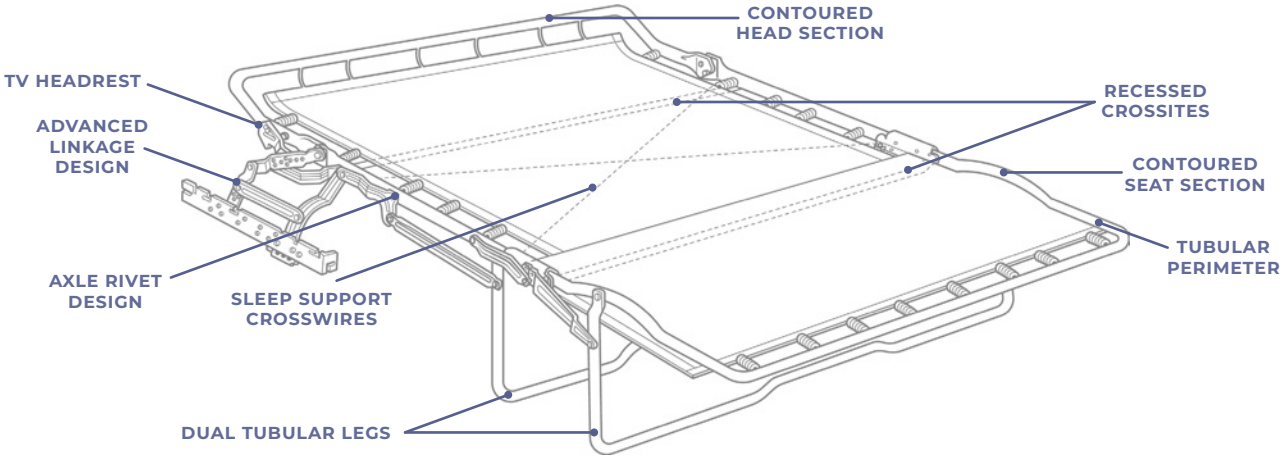
Sold by the pair (as shown in the photo).

S 3919-8

JACKSON

SOFA BED MECHANISMS

Classic Square unit with square tubing framework with high quality features that make it the best available.



Strong Tubular Construction — Provides for a safe, strong, visually appealing mechanism.
Axle Rivet Design — Rivets pass through both sides of the tube at all pivot points for increased durability.
Dual Tubular Legs — For added strength and reduced floor damage.
Memory-Flex Suspension — Helically suspended polypropylene fabric enhances sit/sleep comfort.
Sleep Support Crosswires — For enhanced comfort and support in the sitting and sleeping position.
Versatile Styling — Mechanism suitable for a wide range of styles and front rail heights.
Contoured Head Section — Retains mattress throughout the operating cycle.
Advanced Linkage Design — Allows extra easy opening and closing.
Positive Lock System — Securely encapsulates the mattress throughout the operating cycle.
Double Locking TV Headrest — Provides additional support on both sides of the mechanism. Unit cannot be cycled with the TV headrest in the "up" position.
Contoured Seat Section — Special forming allows a wider seating area for added comfort next to the arm.
Streamlined Side Profile — Eliminates metal protrusions above the mattress line.
