Cultural Heritage Field Program:
Maya Archaeology and Ecology
May 7 - 21, 2017

A multidisciplinary approach to the study of Maya culture history and ecology. Participants will spend their time with an international team of specialists in disciplines such as archaeology, geography, botany, human ecology, & biological anthropology, contributing to research in the Calakmul Biosphere, a protected area of pristine rainforest, & at the archaeological site of Yaxnohcah.

Courses: ARKY 327, ARKY/ANTH 523, or independent studies in ANTH, ARKY, LAST, or UBST

Info Sessions: Thursday, Nov. 3, 3:30-4:30PM, ES 702

Please Contact: Dr. Kathryn Reese-Taylor at kreeseta@ucalgary.ca or UC International, Group Study Programs at group.study@ucalgary.ca
