Supporting Evidence

I did not participate much with the other students. However, I did interact in three instances.

1. I assisted a student with feedback about their HTML code at:
<https://landing.athabascau.ca/blog/view/6868159/unit-4-script-use-and-augmentation>
2. I provided links to validators online that people could use to run their HTML, CSS, and JavaScript code through at: <https://landing.athabascau.ca/discussion/view/6977473/online-validator-resources>
3. I provided a link to a site that lets a student test out their site on a browser other than the one they use at: <https://landing.athabascau.ca/discussion/view/6961850/testing-sites>
